# ACADEMIC TIMETABLE 2020

## SEMESTER 1: 3 FEBRUARY - 26 JUNE 2020

| JAN       | Pay fees before: 15 January 2020  
<table>
<thead>
<tr>
<th></th>
<th>Register: 20 January 2020 onwards</th>
</tr>
</thead>
</table>
| FEB       | Summer School: 10 - 28 February 2020  
|           | Registration for PG Diploma and MPH students ends: 7 Feb 2020  
|           | Registration for PhD ends: to be advised  
|           | Amend registration for Semester 1 modules by: to be advised |
| MARCH     | DUE DATE for Submission of theses for examination by students for August 2020  
|           | Graduation: to be advised  
|           | Applications for Winter School close end March 2020 |
| APRIL     | Graduation: 1 - 9 April 2020 |
| MAY       |                                      |
| JUNE      | Applications for MPH and PG Diploma in Public Health 2020 open |

## SEMESTER 2: 20 JULY - NOVEMBER 2020

| JULY      | Winter School: 29 June - 17 July 2020  
|           | Amend registration for Semester 2 modules by: to be advised |
| AUG       | Graduation: 24 - 25 Aug 2020 |
| SEPT      | Applying to study 2020 (CLOSING DATES):  
|           | Postgraduate Diploma in Public Health: 31 August  
|           | Master of Public Health: 31 August  
|           | PhD in Public Health: 30 November |
| OCT       |                                      |
| NOV       | DUE DATE for submission of theses for examination by students for April 2021  
|           | Graduation - to be advised |
| DEC       | Apply for Summer School 2021 by mid-December  
|           | Graduation: 11 Dec 2020 |

**Assignment deadlines:** The Student Administrators will supply the dates.  
**Dates are subject to change and will be revised in line with UWC Year Calendar**

1 WELCOME TO THE UNIVERSITY OF THE WESTERN CAPE

Mission Statement

The University of the Western Cape is a national university, alert to its African and international context as it strives to be a place of quality, a place to grow. It is committed to excellence in teaching, learning and research, to nurturing the cultural diversity of South Africa, and to responding in critical and creative ways to the needs of a society in transition. Drawing on its proud experience in the liberation struggle, the university is aware of a distinctive academic role in helping build an equitable and dynamic society.

In particular, it aims to:

- Advance and protect the independence of academic enterprise
- Design curricula and research programmes appropriate to its Southern African context
- Further global perspectives among its staff and students, thereby strengthening intellectual life and contributing to South Africa’s reintegration in the world community
- Assist educationally disadvantaged students to gain access to higher education and succeed in their studies
- Nurture and use the abilities of all in the university community
- Develop effective structures and conventions of governance, which are democratic, transparent and accountable
- Seek racial and gender equality and contribute to helping the historically marginalized participate fully in the life of the nation
- Encourage and provide opportunities for lifelong learning through programmes and courses
- Help conserve and explore the environmental and cultural resources of the southern African region, and to encourage a wide awareness of them in the community
- Co-operate fully with other stakeholders to develop an excellent, and therefore transformed, higher education system.

Why don’t you visit the university website at https://www.uwc.ac.za/Pages/default.aspx and learn a little more about your university and the educational opportunities that it offers? From the website, you can access the School of Public Health, the Library, and all other services offered by the university.
2 THE FACULTY OF COMMUNITY AND HEALTH SCIENCES

The School of Public Health is part of the Faculty of Community and Health Sciences (CHS). The Faculty includes departments of Occupational Therapy, Physiotherapy, Social Work, Natural Medicine, Dietetics and Nutrition, Sport, Recreation and Exercise Science, Nursing and Psychology.

In addition, the Faculty is responsible for the Student Health Service, the Institute of Counselling and the Institute of Child and Family Development.

This Faculty is committed to promoting and transforming health and welfare services in South Africa and further afield in the developing world, towards ensuring an equitable, efficient and effective system through excellence in education, research and community service.

The Dean of the Faculty is Prof Anthea Rhoda while Prof Uta Lehmann is the Director of the School of Public Health. To learn more about the Faculty, visit the website at https://www.uwc.ac.za/Pages/default.aspx, under FACULTIES and choose Community & Health Sciences.

3 THE SCHOOL OF PUBLIC HEALTH (SOPH)

The Vision of the School of Public Health is to contribute to the optimal health of populations living in a healthy and sustainable environment in developing countries, particularly Africa, with access to an appropriate, high quality, comprehensive and equitable health system, based on a human rights approach.

The Purpose of the School is to contribute to developing policy-makers and implementers who are knowledgeable and skilled in the principles and practice of Public Health, whose practice is based on research, influenced by informed and active communities, and implemented with a commitment to equity, social justice and human dignity.

The School was established in 1993 as the Public Health Programme (PHP) under the leadership of the late Emeritus Professor David Sanders, to strengthen education and research in Public Health and Primary Health Care at UWC and to build capacity in the health system. Since its inception, the SOPH has established itself as a significant and pioneering initiative in Public Health with increasing continental influence. Some of its key achievements have been:

- providing continuing education opportunities for health and welfare professionals from South Africa and other parts of Africa, through our annual Summer and Winter Schools;
- establishing a substantial integrated research and service programme to which many of our students have contributed;
- developing training manuals and materials arising from research and service work, for service providers;
- providing a multi-level Postgraduate Programme in the field of Public Health, culminating in a Master of Public Health and doctoral studies in Public Health;
- being designated a WHO Collaborating Centre for Research and Training in Human Resources for Health Development in 2004.
- delivering a WHO-UWC Master of Public Health (MPH) specializing in Health
Workforce Development from June 2009-March 2013 for participants from Ethiopia, Mozambique and Rwanda.

- being awarded a SARChI Chair in Health Systems Complexity and Change in 2013, currently held by Prof Asha George, which will consolidate the position of UWC’s School of Public Health as a world-class hub in the global South in this field and build the next generation of academics and researchers in the emerging field of health policy and systems research.
- being awarded a second SARChI Chair in Health Systems Governance in 2015, held by Prof Helen Schneider, to build the field of health policy and systems research with particular focus on health systems governance.
- being awarded an extramural MRC Unit in Health Services to Systems Research in 2015, led by Prof Helen Schneider.

Since May 2009, SOPH has occupied its own beautiful building on the west of UWC’s campus. This was made possible through a generous grant from The Atlantic Philanthropies who have also been instrumental in supporting the work of the School since 2004. Please visit the new SOPH website for more information: www.uwcsoph.co.za.

3.1 THE POSTGRADUATE PROGRAMME

The School of Public Health has been in existence since 1994, when it introduced an MPhil in Public Health which was open to all levels of health and allied health professionals, and those from other related fields. At that time, this was the first of its kind in South Africa. In 2000, the SOPH refined the education programme into a four level Postgraduate Programme in Public Health offered through contact and distance learning. It comprised of a Postgraduate Certificate (PG Certificate) in Public Health, a Postgraduate Diploma (PG Diploma) in Public Health, a Master of Public Health (MPH) and a PhD in Public Health.

Over the years, the Postgraduate Programme has been reconfigured on a number of occasions in response to the requirements of the Department of Higher Education and Training in South Africa, shifts in the needs of the health system and a changing student profile. The most recent change concerns the MPH which has been re-curriculated to cover a wider scope of content, and to provide more support in the area of research. This Master of Public Health was offered for the first time in 2013.

The Programme has been designed to enable health professionals to study Public Health while remaining in their professional posts, in response to the health workforce shortages in Africa. In line with international trends in Public Health training, the Programme is conceptually orientated towards the needs of Lower and Middle Income Country contexts, health sector reform and international health movements. It is at the same time alert to community involvement in health provision. Its pedagogy stresses practical application of knowledge and skills in the field while studying.

The key goals of the coursework are to equip graduates to:
- Identify, quantify and prioritise the health problems and needs of communities.
- Design, implement and evaluate comprehensive and participatory programmes aimed at countering these problems and meeting health needs.
- Communicate effectively with service providers and communities about Public Health and Primary Health Care.
- Demonstrate leadership in transforming the health and welfare systems of Africa.

The Programme is accessible to health, welfare and allied health professionals from all
the provinces of South Africa, and to those from other countries on the African continent. To date, students have registered from South Africa, Namibia, Malawi, Uganda, Swaziland, Lesotho, Zambia, Zimbabwe, Botswana, Niger, Kenya, Nigeria, Ghana, Burkina Faso, Somalia, Central African Republic, Angola, Senegal, Rwanda, Tanzania, Mozambique, Cameroon, Ethiopia, Seychelles and occasionally by special arrangement, from countries beyond Africa.

4. STAFF OF THE SCHOOL OF PUBLIC HEALTH (SOPH)

Keeping regular contact with the SOPH student administrators and your lecturers is one of the keys to success when studying at a distance. There is a list of all our numbers at the end of the Programme Handbook. The administrative staff (Ms Corinne Carolissen and Ms Janine Kader) are the main interface between you, the UWC and the SOPH co-ordinating most administrative aspects of the Programme.

School of Public Health (switchboard): Ms Ntombomzi Buzani: (+27) 21 959 2809
School of Public Health (fax number): +27 21 959 2872
School of Public Health (email): soph-comm@uwc.ac.za;
Ms Corinne Carolissen: +27 21 959 2166; ccarolissen@uwc.ac.za;
Ms Janine Kader: +27 21 959 2591; jkader@uwc.ac.za.

Save time by contacting the right person straight away!
One of the imperatives of distance learning is contacting SOPH staff when you need them. Many students find the shift to distance learning difficult because they cannot reach lecturers when they need to discuss something. It is important to recognise that this is a two way relationship: you need to be strategic and make sure your needs are heard.

You are encouraged to contact any of us when you need help. You will find our office and mobile numbers at the back of this Handbook. Our academic staff members are open to you calling them on their cell phones if you need assistance. It would, however, be appreciated if you made these calls before 20h30 and after 08h00.

Successful students are usually those who ask for help when they need it!
Try to save time and cost by contacting the right person straight away. Please take note of the SOPH staff members below who play important co-ordination and support roles within the academic programme.

</table>
Remember that SOPH academic staff, like you, are busy people and research takes them out of the office regularly, so if you do not reach your lecturer on the office telephone number, follow these tips:

### Reaching academic staff members of the SOPH

- **Don’t leave queries to the last minute before a deadline.**
- **Call the SOPH receptionist at 021 959 2809 and ask to be put through to the academic staff member.**
- **Text or call the lecturer’s mobile. Don’t forget to identify who you are and to leave your number slowly and clearly indicating which country you are calling from.**
- **Leave a clear message and contact time on the academic’s mobile phone.**
- **Leave a message with the Student Administrators (021 959 2166 or 021 959 2591) asking your lecturer to phone you back.**
- **Send an e-mail to the academic staff member.**
- **If repeatedly unable to reach the academic staff member, contact your PGD or MPH Programme Co-ordinator.**
- **And …never give up making contact with SOPH academics!**

You also need to do your part by familiarizing yourself with the contents of this Handbook.

The Student Administrators are there to answer queries which are not answered by this Handbook!

Get to know the SOPH staff who are involved with the Postgraduate Programme:

*Please note that all academic staff members are involved in supervising mini-theses. You might want to take a look at the SOPH where you will find similar information about all staff members - and also photographs and links to their publication: [http://www.uwcsoph.co.za/index.php/about/staff](http://www.uwcsoph.co.za/index.php/about/staff).*
**Director of the School of Public Health**

**Prof Uta Lehmann, MA (Hannover), PhD (Hannover)**
She joined the SOPH in 1999 as a senior lecturer. With a background in social sciences and a PhD in social history, she worked in health personnel education since 1991. Her interest and expertise lie in human resource development, monitoring and evaluation, qualitative research and resource-based learning. Particular research interests include the impact of HIV on human resources in the health sector, the role of mid-level and community-based workers in primary health care and questions of capacity development of health service delivery at the district level. She has worked extensively with the WHO and coordinates the WHO Collaborating Centre on Research and Teaching in Human Resources for Health at the School.

**SOPH Academic Staff in alphabetical order**

**Mr Woldekidan Amde, BA (Addis Ababa), MA (Ruhr-Bochum), MA (UWC)**
**PROGRAMME MANAGER: WHO-UWC HR MASTERS.** Having worked as a development professional in Ethiopia and South Africa, Woldekidan joined the SOPH in 2009 as the Program Manager of an inter-country WHO-funded MPH program on Health Workforce Development. He also represents SOPH in the Consortium for Health Policy and Systems Analysis in Africa, a consortium of 11 universities from Africa and Europe. His background is in sociology, development management, administration, and information communication technology. Woldekidan also manages the SOPH website, the SOPH OER Repository website, and the ‘HRH for Africa’ website, a digital resource centre the SOPH is implementing as a WHO Collaborative Centre.

**Ms Jenny Birkett (BA , University of Natal; HDip Ed, University of Natal; BEd, UCT; MEd in Applied Language Studies, UCT)**
Jenny’s background is mainly in adult education; she worked for many years teaching and developing training materials for adult literacy and adult education NGO’s, and lectured at CPUT in Education, and at UCT on the Adult Education Certificate programme. She also has experience and a strong interest in language education and academic literacy development and has taught language education and academic support at the Education Faculties at UWC and CPUT. At the SoPH Jenny provides educational and language expertise to assist with materials development, academic literacy initiatives and teaching academic literacy skills to students. Jenny also provides assessment support to Module Convenors.

**Dr Hazel Bradley, B Pharm (Bath), MPH (UWC), PhD (UWC)**
Hazel Bradley is a pharmacist with an interest in Primary Health Care. Prior to joining the SOPH in 2003, she worked with a Cape Town non-governmental organisation delivering Primary Health Care, and in primary level drug management. Hazel’s PhD research was on district level pharmaceutical human resources. Her other interests include public health pharmacy education, pharmaceutical information systems and access, availability and rational use of medicines. Hazel is leading the establishment of a Pharmaceutical Public Health track within the MPH which includes the first fully online modules offered by SOPH, *Rational Medicines Use, Medicines Supply Management and Pharmacy Policy and Management*.

**Prof Diane Cooper, B. SocSci (UCT), BA Hons (UCT), PhD (UCT)**
Diane Cooper is a Professor in the School of Public Health at UWC. She teaches and supervises MPH and PhD students. She has 25 years’ experience in public health, health services and systems teaching and research, particularly in research methods, sexual and reproductive health, gender and health and women’s health. Her current main research activities are in the linkages between HIV and reproductive health issues and care, for which she is known internationally. She has developed substantial teaching and research links with organisations in the academic, non-governmental and civil society and government health sectors in public health, particularly in southern and eastern Africa. She additionally has very extensive collaborative links internationally outside of Africa in South and North America and Europe. She has published widely, internationally. She also convenes the Public Health Research module.

**Dr Peter Delobelle, MBChB (Belgium), PhD (Belgium), FRSPH (UK)**
Dr Peter Delobelle is a medical doctor with qualifications in tropical medicine and public health, who has worked in South Africa since 2004 as the project coordinator of a North/South academic collaboration. He has taught epidemiology and social medicine to undergraduate and
master classes in Belgium and South Africa and will assist in supporting the distance education modules at UWC. His research focuses on health systems policy and health promotion and aims at informing health promotion interventions to address the growing burden of non-communicable diseases in sub-Saharan Africa.

Prof Asha George, BA (Georgetown University), MSc (Harvard), D Phil (Sussex University). South African Research Chair in Health Systems, Complexity and Social Change
Asha George is a qualitative researcher engaged with health systems to advance health and social justice in low- and middle-income countries. With a gender and rights lens, she focuses on the frontline interface and governance of services taking into consideration community and health worker perspectives. She is currently the South African Research Chair in Health Systems, Complexity and Social Change. She is also Vice-Chair of Health Systems Global and co-chair of the Health Systems Determinants of Coverage Working Group for Countdown to 2030. She has worked as an advisor to UNICEF, WHO and USAID on community based approaches. Her longer term national level work includes work in India, she partnered with allies across community, district, state and national health systems to advance maternal health from a gender and rights perspective. Prior to that she worked in Mexico with government ministries and the UN system to advance the Beijing and Cairo agendas for women's health and rights.

Ms Barbara Hutton, BA Social Work (Hons), BEd (Hons) (University of the Witwatersrand)
Barbara Hutton has over 25 years’ experience as an educational researcher, writer and editor. She has a strong foundation in adult and distance learning, with a special interest in the field of public health. She has contributed to a range of health projects and materials for local and international bodies including government departments, universities, colleges, research institutions, non-governmental organisations, corporates and publishers. She has worked with the SOPH for the past eight years providing support in materials development, academic literacy training and the assessment of student assignments.

Ass Prof Lucia Knight, BSc (UCT), MPopStuds (UKZN), PhD (LSHTM)
Lucia Knight joined SOPH in 2014, before this she was working as a Research Specialist in the HIV/AIDS, TB and STI Research Unit at the Human Sciences Research Council. Her PhD research was conducted through the London School of Hygiene and Tropical Medicine at the Africa Centre for Health and Population Studies and explored the family-level impacts of HIV/AIDS. She continues to conduct research about the intersect between HIV and the family. Lucia’s other research interests include the social determinants of health, maternal health and sexual and reproductive health. Lucia teaches Qualitative Research Methods.

Ass Prof Ernesta Kunneke, BSc (US), Dip Hosp Dietetics (UOFS), BSc (Hons)(US), M Nutrition (US), PhD (North West Uni)
Ernie Kunneke has been with the Division of Dietetics at UWC since 1997 and now heads the Division. She has qualifications in Dietetics and Nutrition and experience in community nutrition, micronutrient malnutrition and dietary assessment methodology research. She teaches nutrition at undergraduate and postgraduate levels and is currently involved in research on iron deficiency. She wrote and convenes the Micronutrient Malnutrition module.

Dr Verona Mathews, BA Social Work (Hons) (UWC), MPH (UWC), PhD (UWC) 
CO-ORDINATOR OF MPH COURSEWORK
Verona Mathews joined the SOPH in 1999, and initially worked in the health information systems programme. She has facilitated and co-ordinated the development, training and implementation of the national district health information system. She continued working in human resource management developing information and monitoring systems. Her PhD research project was on the development of a monitoring framework for District-based human resource management. She teaches Management Strategies for the Public Health Services I and Health Information Systems for Evidence based Management.

Dr Thubelihle Mathole, BSc Hons (UZ), MPA (UZ), PhD (Uppsala University, Sweden)
Thubelihle Mathole joined SOPH in February 2008. She has wide experience in research, training and programme planning and management. Her areas of interest are international/global health, monitoring and evaluation, human resource management, HIV/AIDS and maternal and child health. She assists with the Qualitative Research
Methods module.

**Ass Prof Zandile Mchiza, BSc (Nutrition and Dietetics) (UWC), MSc & PhD (UCT)**

Zandile Mchiza is an obesity, nutrition and non-communicable disease research specialist. She joined the School of Public Health (SoPH) in January 2018, where she convenes the Descriptive Epidemiology Course at Post Graduate level and organizes the Non-Communicable Disease Research Cluster for the School. Prior to joining the SoPH she was a Senior Research Specialist and a Senior Specialist Scientist at the Human Sciences Research Council (HSRC) and the Medical Research Council (MRC) of South Africa, respectively. In these research councils she led and collaborated in projects directed at improving and preventing nutritional disorders, body size and image distortion as well as metabolic diseases in South Africa and other African countries. Her other contributions to science have been capacity development (especially developing research skills of previously disadvantaged young scientists). She also represented the Public Health Nutrition (Cambridge Core) Journal as an Associate Editor; and sat in the panel committees for Research Career Development organized by the National Research Foundation (NRF), the MRC and the NIH (Fogarty Initiative). More recently, her interests are reviewing food-, nutrition- and health-related legislations and policy documents to identify the key legislation and policy adoption and delivery challenges, as well as trace their implementation processes, in order to find workable solutions to advise legislation and policy amendments. All this work is directed at safeguarding the health and nutrition status of the South African public.

**Ms Ziyanda Mwanda, BSc Biotech (UWC), PGD Educational Technology (UCT)**

Ziyanda Mwanda qualified with a BSc Biotechnology in 2012. She worked at SOPH as a student and research assistant during her studies and now contributes to the programme by preparing materials, e-learning support, and a range of administrative roles. She is currently busy with her Masters in Education, specializing in Educational Technology.

**Dr Anam Nyembezi, BA (UKZN), BA Hons (UKZN), MPP (UKZN), PhD(UM)**

Anam Nyembezi training is in work and social psychology with a passion for men’s health research. Prior joining SOPH in January 2018, he was a research specialist in the Population Health, Health Systems and Innovation at the Human Sciences Research Council conducting research focused on maternal and child health, sexual and reproductive health, mental health, and non-communicable diseases. He also spent several years at the South African Medical Research Council conducting research on youth risk behaviours, including understanding the determinants of HIV behaviours among traditionally circumcised men. His research interests continue to be on men’s health with a focus on socio-behavioural aspects of sexual reproductive health, HIV/AIDS, mental health and non-communicable diseases.

**Prof Thandi Puoane, B (Cur) (UNISA), BA SocSci (UNISA), MPH (Berkeley), Dr PH (Berkeley). Emeritus Professor**

Thandi Puoane has extensive experience in nursing, teaching and public health research. Her research areas include child nutrition including the hospital management of severe malnutrition, identification of CVD risk factors, particularly obesity, participatory action research and monitoring and evaluation of programmes. She is a member of Chronic Disease Initiative for Africa and the Cape Town PI of a global study, the Prospective Urban Rural Epidemiological study.

**Ms Nikki Schaay, BA Hons (Psychology) (UN), MPH (UWC)**

Nikki Schaay’s experience includes work on a schools project on gender-based violence, which she explored as the basis of her Master of Public Health (MPH). She has worked in the field of HIV/AIDS since 1991 with her activities having included managing local non-governmental HIV/AIDS projects and then directing a national project focused on developing HIV/AIDS policy for government. Having worked at the SOPH previously (1998–2000), Nikki re-joined the SOPH in 2004 and contributes to SOPH’s work in the field of comprehensive primary health care. Nikki convenes the Population Health and Development II module, and her research interests include primary health care, community participation and health systems responsiveness.

**Prof Helen Schneider, MBChB (Cape Town), Masters of Medicine (Com Health), Dipl in Tropical Medicine & Hygiene (Witwatersrand), Dipl in Child Health (SA College of Medicine). South African Research Chair in Health Systems Governance**

Prof Schneider is a public health specialist and professor at the School of Public Health,
University of Western Cape, which she joined in March 2011. She was previously based at the University of Cape Town, and prior to that spent 15 years at the Wits University’s Centre for Health Policy, which she directed for eight years. Her area of work is health systems and policy, and her interests have included analyses of AIDS policy and the challenges of health sector transformation in post-apartheid South Africa. More recently her interests have become oriented to the health system-wide implications of programmatic interventions such as ARV scale up, documenting policy implementation processes and strategies to formalise and integrate lay work and community based care and support initiatives into primary health care. Helen has been involved in the redevelopment of the Health Management for Public Health II module.

Prof Rina Swart, BSc Dietetics Hons (US), MPhil, PhD (UWC)
Rina Swart previously headed the Dietetics Division at UWC. She has been involved with the SOPH since its inception in 1993. She has qualifications in Dietetics and Public Health. Her field of expertise is Community Nutrition and specifically, Community-based Nutrition Programming and nutrition education.

Dr Hanani Tabana, BSc (UCT), MPH Epidemiology (UCT), PhD (KI)
Hanani Tabana joined the SOPH in 2015. Prior to joining the School, she was a lecturer at Stellenbosch University, Community Health division. Hanani Tabana spent most of her research career years at the Medical Research Council conducting various research activities in the area of HIV/AIDS prevention. It was at this time that she enrolled for a PhD at Karolinska Institutet in Sweden. Her PhD was primarily focused on HIV prevention, HIV counselling and testing in particular and how a strategy such as home-based HIV testing could supplement other testing strategies, for rural ‘hard-to-reach’ populations. Her research interests continue to be in HIV/AIDS research with a focus in maternal and child health (including sexual and reproductive health). In addition, she is interested in conducting economic evaluations alongside research studies. Hanani is the convenor of the Measuring Health and Disease II module.

Dr Lungiswa Tsolekile, BSc (Hons) Dietetics, MPH (UWC), PhD (UWC)
Lungiswa Tsolekile is a dietician and lecturer at the School of Public Health. Since joining the School of Public Health she has worked in numerous research projects such as Chronic Poverty, a study investigating the response of households to shocks mainly HIV/AIDS pandemic, Primary Prevention of Non-communicable diseases in the townships and Prospective urban and Rural Epidemiological study (multi-country study). Her main research interests are in the primary prevention and control chronic non-communicable diseases (NCDs) and obesity adults and children. She has worked with community health workers (CHWs) in a peri-urban area in designing a programme to increase community awareness of risk factors and prevention of NCDs with a focus on physical activity. She is a presently busy with a PhD focusing on the development and implementation of an integrated training for community health workers working with chronic NCDs in an urban setting. She convenes the Monitoring and Evaluation module.

Prof Brian van Wyk, BSc (Hons), MSc, DPhil (SU)
Prior to joining SOPH as a lecturer in 2006, Brian van Wyk was a chief researcher in the Social Aspects of HIV/AIDS and Health research programme at the Human Sciences Research Council. His doctoral research on psychosocial support for Primary Health Care staff was conducted during his internship in the Health Systems Research Unit of the Medical Research Council. He was a recipient of the prestigious Fogarty HIV/AIDS and TB Research training fellowship at Columbia University, New York in 2006-7. His current research interests are in access and adherence to HIV treatment and social capital formation in an era of HIV and AIDS. He convenes the Quantitative Research Methods module.
ADMINISTRATION AND CO-ORDINATION AT SOPH

Ms Sidiqa Abbas  
Finance Administrative Officer  
Sidiqa Abbas is responsible for the financial administration of various projects in the School which includes the management of various project funds. She came to the University in May 2010, having worked in the private sector.

Ms Tasneem Abrahams-Abbas  
Administrative Officer  
Tasneem Abrahams-Abbas joined the SOPH after a short-term contract at UWC’s Business Innovation Centre. She is responsible for building management, venue allocation and provides support to a range of staff. She also procures the equipment and assists with Winter and Summer School administration.

Ms Bridget Basson  
B Admin (Hons)(UWC)  
Administrative Officer  
Bridget Basson started her career at UWC as an administrative assistant at the Education Policy Unit. She joined the SOPH as a receptionist in 2000 and currently co-ordinates the annual Winter School programme. She also provides support to the Summer School programme. In addition, she does arrange conferences and meetings and provides secretarial and administrative support to a range of staff members.

Ms Ntombomzi Buzani  
Receptionist  
While working for Securitas as a security officer at UWC, Ntombomzi Buzani was posted in the SOPH building from 2013. In March 2017 SOPH appointed her as office assistant, and six months later as receptionist. She is responsible for the switchboard, general administration and venue bookings and assists with Winter and Summer Schools.

Ms Corinne Carolissen, ND Exec Sec, NHDPSE (Pen Tech/CPUT)  
Senior Programme Officer: Postgraduate Programme  
Before joining SOPH in 2001, Corinne Carolissen worked in the retail industry for a buying support group, first as a buyer’s assistant and then as secretary to the regional manager. After studying Education, she moved to the non-governmental sector where she worked for Grassroots Educare Trust for 8 years in finance and administration, taught adult learners, and organized national workshops. At SOPH, she co-ordinates the administrative functions of the academic programmes, including co-ordinating thesis administration for MPH and PhD programmes, assists with the Winter and Summer Schools administration, and provides support to a range of staff and students.

Ms Teresa de Lima  
Senior Financial Administrator  
Before joining the SOPH in May 2004, Teresa de Lima worked at the SA Reserve Bank for 16 years, as well as at the Independent Development Trust and the European Parliamentarians for Africa. She is responsible for the financial administration of various projects in the School which includes the management of many project funds.

Ms Carnita Ernest, BA (UCT), BSocSc (Hons) (UCT)  
Project Manager  
Carnita Ernest re-joined SOPH in August 2016, having been part of the SOPH team in 2008. She has more than 15 years of experience working in the civil society sector focusing on issues of governance, peace-building, health and development. Underpinning all of this work is her personal commitment to human rights, gender equity, and social justice. Carnita has previously held senior positions within the Centre for the Study of Violence and Reconciliation (CSVR), and the Centre for Citizens’ Participation in the African Union (CCPAU). She has also worked as an independent consultant. She has conceptualised and led complex multi-country projects, undertaken fundraising for project and institutional needs, and overseen end-of cycle evaluation of programmes, working with a diverse range of individuals and stakeholders. As Project Manager within SOPH, she co-ordinates projects, provides assistance for grant applications to academics, and monitors project progress and reporting.

Ms Cara Fisher  
BCom Finance (Hons) (UWC)  
Finance Officer  
Cara Fisher joined the SOPH after a long term contract with Economics Management Sciences
Faculty as a Facilitator. She is responsible for smaller NRF entities and all payment requests.

**Ms Janine Kader HCED (UWC)**  
**Administrative Officer: Postgraduate Programme**  
Janine Kader joined the SOPH in February 2002. She co-ordinates the administration for the Postgraduate Diploma and Master of Public Health. She co-ordinates the intake of new students and their registration and provides administrative support to a range of academic staff and students. Janine is currently enrolled in the Advanced Diploma in Public Administration Programme at UWC.

**Ms Nolitha Komeni BCom (UWC), PGCE (UNISA)**  
**Senior Office Co-ordinator**  
Nolitha Komeni re-joined SOPH as Senior Office Co-ordinator in June 2019. Nolitha previously held the position of Administrative Assistant / Receptionist at SOPH in 2013. Thereafter she joined the Education Faculty at UWC and worked as Administrative Officer for two years. Before returning to SOPH she held the position of Faculty Assistant for four years at the Faculty of Health and Wellness, Cape Peninsula University of Technology at their Bellville Campus. In her new position at UWC she heads the Administration of the School and her responsibilities include office and personnel management, oversight of summer and winter Schools and the financial administration of projects.

**Ms Tamlin Petersen Mgt Dev Prog (UWC)**  
**Administrative Officer**  
Tamlin Petersen joined the SOPH in 2002, initially working part-time on the Summer and Winter Schools. She joined the staff full-time in 2009 when she became the administrative co-ordinator for the newly-formed UWC Centre for Research in HIV and AIDS, a position she held for five years. This comprised the overall administration of the Centre and event management, particularly the annual international HIV-in-Context Research Symposia. Following this, Tamlin has become the Events and Grants Administrator for the School. In 2018 Tamlin completed the Management Development Programme at UWC and is currently enrolled in the Senior Management Development Programme.

**EXTRAORDINARY PROFESSORS**

**Prof Fran Baum, Bachelor of Arts (Hons) (University of Wales), PhD (University of Nottingham)**  
Fran Baum is the Matthew Flinders Distinguished Professor of Public Health, and foundation Director of the Southgate Institute of Health, Society and Equity at Flinders University, Adelaide, Australia.

SOPH has had a long-standing, collegial relationship with Prof Baum and the Southgate Institute for Health, Society and Equity: in 1997 Prof Baum and members of her academic team provided invaluable technical assistance to the School in establishing its pioneering distance education programme and were co-authors of many of the original core module of our MPH programme. Since then Prof Baum and the SOPH, under the leadership of the late Prof David Sanders, have continued to work together on a number of international public health research initiatives such as ‘Revitalizing Health for All: Learning from Comprehensive Primary Health Care (CPHC) Experiences’ (2007-2011), and a current initiative of ‘Punching above their weight: Building capacity for research on why some countries have better life expectancies than predicted by national income’ (2018-9).

Prof Baum is internationally recognized as a leader in applying social science skills to the study of the social and economic determinants of health and health equity. She has been advisor and consultant to the WHO on Healthy Cities, Health in All Policies and the social and economic determinants of health and has a strong record of research translation to policy and practice. Most notably she served as a Commissioner on the WHO Commission on Social Determinants of Health (CSDH) from 2005 – 2008. Prof Baum is a dynamic and esteemed public health educator and facilitator and her books, “The New Public Health” and the more recent “Governing for Health” are key resources we use in our PGD and MPH learning and teaching programmes.

**Prof Tanya Doherty, BNursing, MSc Nursing (Cape Town), MPH (Harvard), PhD (Uppsala)**  
With qualifications in nursing and public health, Tanya Doherty’s main research focus areas are community interventions to improve child health and nutrition. She has led cluster-
randomised trials, cohort studies and multi-country evaluations of programmes across Africa and has published over 100 peer-reviewed articles. Tanya holds a joint position with the SOPH and the South African Medical Research Council.

Prof Lucy Gilson, BA (Hons) (Oxford), MA (East Anglia), PhD (London)
Lucy Gilson holds the appointment of professor both at the University of Cape Town and the London School of Hygiene and Tropical Medicine, UK, and is an honorary professor at the University of the Witwatersrand. Throughout her career, her research has been driven by a concern for equity in health and health care. This has involved conceptual and empirical work on issues of health care financing, organisation, management, and policy change. Lucy has also played a leading role in developing the field of health policy analysis, and currently manages a continental initiative to strengthen training in this field. She has also conducted collaborative research with colleagues in other countries in Eastern and Southern Africa, and in Asia.

Prof Debra Jackson, BSN (Florida State), MPH (San Diego State), DSc (Boston)
Since November 2013 Debra Jackson has been senior health advisor and chief of the Implementation Research and Delivery Science Unit, Health Section, UNICEF, which focuses on maternal, newborn, child and adolescent health programme research, data and digital health. Debra lived in South Africa from 2000 to 2013 and has experience working across Africa, Asia Pacific Islands and the USA. At the SOPH she has served as principal investigator for a range of research projects, such as the multi-country PROMISE-EBF trial on promoting exclusive breastfeeding and the national evaluation of the South African Prevention of Mother-to-Child Transmission of HIV. Debra has qualifications in nursing, public health, epidemiology and biostatistics. Her interests are maternal and child health (MCH), nutrition, research ethics, health systems and imbedded implementation research, MCH data and digital health. Her most recent research focus has been on prevention of mother-to-child transmission of HIV, infant feeding, birth registration, newborn health in emergencies and community health workers. She has over 100 peer-reviewed publications.

Prof Richard O. Laing, M.D. (Zimbabwe), M.Sc. (London), D.A. (South Africa), MBCHB (Hons) (Zimbabwe)
Richard Laing is a physician who worked for 18 years at all levels in the Ministry of Health in Zimbabwe. After receiving postgraduate degrees in public health and health policy, he spent 13 years in Boston, USA, where he initially worked for an international consulting company, Management Sciences for Health, establishing the International Network for the Rational Use of Drugs, and was an editor for Managing Drug Supply (2nd edition). He taught international public health at Boston University School of Public Health before joining the WHO in mid-2003 as a medical officer. During his ten years at WHO, Richard served on a number of expert committees and has been engaged in working on measurement of medicines pricing and availability as part of the joint WHO/HAI project on medicine prices. Richard has an extensive list of academic publications: he edited the Essential Drugs Monitor; he was one of the authors of the Priority Medicines for Europe and The World reports; and was also the editor of the WHO World Medicine Situation (3rd edition). In 2014 Richard became Professor of International Health at Boston University School of Public Health, teaching primarily in the pharmaceuticals track. His research has focused on access to medicines such as insulin and on evaluating pharmaceutical company access initiatives such as Novartis NCD Access and the IFPMA multi-country Accelerating Access for NCDs. He has received two Carnegie African Diaspora Fellowships to spend time at UWC.

Prof Christina Zarowsky, MD (McMaster), MPH (Harvard), PhD (McGill)
Christina Zarowsky was a professor in the SOPH where she also headed the university-wide Centre for Research in HIV and AIDS from 2009 to 2013. At the end of that year she left to become the Professor and Director of the Department of Social and Preventive Medicine in the School of Public Health of the University of Montreal – and is also a researcher at the University of Montreal Hospital Research Centre. A medical doctor and anthropologist, Christina has specialised in public health. From 2000, she worked for the Canadian International Development Research Centre (IDRC) where she led the Research for Health Equity suite of programmes and developed several donor partnerships. Her work at SOPH took forward the focus of her work at IDRC which examined public health and health systems issues from a governance perspective, emphasising civic engagement, attention to power and process, and strengthening linkages between research, policy, practice, and social change. Her areas of interest include social determinants of health, community and systems perspectives on HIV and AIDS, refugee and migrant health, and research capacity strengthening.
EXTRAORDINARY ASSOCIATE PROFESSORS

**Associate Prof Ehimario Igumbor, BSc. Hons (UZ), MPH (UNIVEN), PhD (UWC)**

After spending almost six years at the SOPH, Ehi Igumbor joined the US Centers for Disease Control and Prevention (CDC) in 2012 as a public health specialist, where he provides technical oversight to several epidemiological surveys, surveillance and operation research projects supported by the US government in South Africa. Ehi has served on several technical advisory boards and expert panels of WHO, UNAIDS, the Global Fund, the South African National Department of Health and the South African National AIDS Council (SANAC). He is also a regular reviewer for the National Research Foundation (NRF), external evaluator to Umalusi, among other quality standards organisations in the higher education landscape. Between 2010 and 2013, Ehi served on the national executive committee of the Public Health Association of South Africa (PHASA). As an extraordinary associate professor, Ehi continues to support SOPH’s training programmes in Epidemiology and Health Information Systems, supervising Masters and Doctoral students. He has a broad research interest in public health and has published extensively in the areas of chronic disease epidemiology, burden of disease analyses, public health education, and monitoring and evaluation of routine health information systems. In his MPH, Ehi specialised in Health Measurements (Epidemiology, Biostatistics and Population Studies). He also has a PhD in Public Health.

**Associate Prof Vera Scott, MBChB (UCT), DCH (UCT), MPH (UWC), PhD (UWC)**

A medical doctor, Vera Scott worked as a clinician and programme co-ordinator within a fledgling district health system in Mitchells Plain in Cape Town in the late 1990s. While at the SOPH, she worked extensively on projects aimed at developing and strengthening district health information systems and contributed to developing a South African HIV Gauge, a Cape Town Equity Gauge and provincial HIV and TB monitoring and evaluation systems. She left the SOPH in February 2016 to help establish the Tekano Fellowship programme. Vera completed an MPH at the SOPH in 2001, and her PhD in 2015 through which she explored the factors that influence how facility managers use health information.

EXTRAORDINARY SENIOR RESEARCHER

**Dr Marisa Casale, PhD (UCT), Masters in Rural Development Cooperation (Italy)**

While Marisa Casale started her career in finance working for an Italian development bank, she has spent the past twelve years conducting health research in South and Southern Africa. Her multi-disciplinary research foci include HIV prevention among youth, the economic aspects of HIV, social networks and health, and caregiver and child health in Southern Africa. Marisa has extensive international networks and has more recently been collaborating on health research projects at the Department of Social Policy and Intervention at Oxford University where she is also a research associate. From 2005 to 2015, she was based at the Health Economics and HIV/AIDS Research Division (HEARD) at the University of KwaZulu-Natal, where she co-ordinated a Health Governance and Finance programme. Marisa is a NRF Y-rated researcher. She has been an Extraordinary Senior Researcher with SOPH since April 2017.

Contact details of all staff are included at the end of the Programme Handbook.
5. THE SOPH POSTGRADUATE PROGRAMME

Our programme has been designed to be as open and flexible as is viable for working professionals. Students are able to continue to work in the services while studying part-time.

5.1 DIAGRAM OF THE SOPH’S POSTGRADUATE PROGRAMME 2020

Access to the next level is not automatic and is dependent on the student’s performance.

5.2 MODE OF STUDY

The SOPH Postgraduate Programme is offered through a combination of distance learning materials written in the form of interactive study sessions plus optional contact sessions (Summer and Winter School), as well as phone and e-mail contact. From 2018 we are solely delivering our modules through iKamva, UWC’s integrated on-line Learning Management System (a SAKAI e-learning platform) which we have piloted with selected modules over the past couple of years.

Your study materials for each module will comprise a Module Guide, readings and additional materials. These will also be lodged on the Module’s online platform on iKamva, which offers various educational technologies to facilitate greater interactive engagement between students at a distance and the module convenors. These include asynchronous online Discussion Forums and synchronous webinars. More information on iKamva follows in Section 7.

SOPH’s face to face contact sessions are held at our annual Summer and Winter Schools at the SOPH, UWC campus in Cape Town. Summer School courses in February/March complement the first semester modules; Winter School modules complement 2nd semester modules. Winter school courses are also open to health professionals in the services and members of the public. More details follow in Section 5.4

5.3 DECIDING ON YOUR PACE OF STUDY

Deciding on the pace of your studies is probably the most important decision you are going to take. How many modules you take per semester affects how long it will take you to complete your qualification. Since you will be continuing to work while you study, and in most cases, managing family life as well, you will need good time management skills, strong family and workplace support, as well as a dedication to stay on the course. Although distance learning is demanding, the open-learning nature of this Programme allows you to make some choices regarding the pace at which you study. Options regarding pace of study are outlined in the Postgraduate Diploma and MPH sections of this Handbook.

The workloads for all the qualifications in this Programme are substantial. You will probably have to find 15-20 hours of study time per week during university semesters. So work out realistically how much time you have available and select your study load accordingly. The University, however, prescribes the minimum number of modules you may take in order to ensure that you complete the programme within the required period. More information about your pace of study is offered in the sections on each qualification.

You are welcome to consult the MPH or Postgraduate Diploma Co-ordinator regarding your pace of study and in relation to the MPH: the selection of modules.

Other students’ experience of studying part-time:

Students taking four and more modules in one year have said that it requires you to sacrifice all social events, work late into the night, and keep sharply focused on your study goals. This probably also means that you tend to neglect family commitments and this can add tension to your life. Many mature students have multiple responsibilities as breadwinners, parents, and care givers to older parents. It may therefore be better to commit yourself to a slower pace of study. Please take a good hard look at your own situation: no one but you can make this decision!
These students’ experiences bear this out:

“I would strongly advise health professionals who are working to think carefully about how many modules they take. I registered for six modules because I wanted to get on with the Masters. But I had to attend a number of workshops for my job; also we drive at least two hours every day to meet the communities we serve. We return very tired. As a result, I dropped two modules and failed one, and now I have to pay twice for my modules. This has been discouraging, and I feel it does not really reflect my academic ability.”

“I did not take into account that my family commitments and cultural activities would take up so much time this past year. Although I passed, I did not need to go through so much stress. If I knew what it would be like, I would have taken it over three years.”

Many health professionals on the programme have chosen to study at the slower pace. This certainly pays off in terms of their engagement with the programme and the quality of work they produce; it also reduces their stress levels. But have no doubt, it still requires good time-management! If you are in any doubt about the workload, discuss it with one of the Student Administrators or the level co-ordinator of your programme. Misjudging your time could result in your falling behind with assignments, dropping a module and thereby wasting fees, becoming demotivated or causing yourself unnecessary stress.

5.4 SUMMER AND WINTER SCHOOL SHORT COURSES

Twice a year at Summer and Winter School, contact sessions are offered free to SOPH students for the modules for which they are registered for the current year. Those who attend other Short Courses at Winter School for their own interest will pay 50% of the attendance fees.

| Summer School takes place from 10 – 28 February 2020. The Programme will be circulated to you in December. |
| Winter School will be held 29 June – 17 July 2020. The Programme will be circulated to you in March. |
| Academic Skills workshops are offered during these periods. |

Most Short Courses correspond with and support the distance learning modules: they serve both as an introduction to the module and as enrichment for learning. The Short Courses are known and valued for their interactive approach. If you attend a Short Course, you must still take the same module by distance learning (DL).

Although optional (because of the cost of travel and accommodation, and our students’ work commitments, attendance is strongly recommended at least once a year and particularly for the MPH modules: Measuring Health and Disease II, and Quantitative and Qualitative Research. Each Short Course runs from Monday to Friday between 08h30 - 16h30. Academic Development and Information Literacy workshops are also held during this period.

MPH students should note that some newly developed MPH Electives are delivered only as Short Courses (SC) at Winter School; if you select one of these, you must attend Winter School, complete all required reading and activities and then complete two assignments.
**Costs Attached to Short Courses:**
As a registered student, you are entitled (without payment of extra fees) to attend Summer and Winter School courses which match your first and second semester modules. You will, however, have to cover the costs of transport, accommodation and meals. SOPH provides a list of Bed and Breakfast establishments nearby.

**Booking Early for Summer and Winter Schools:**
Always submit your online bookings early to ensure a place in Short Courses, as the Winter School courses are often oversubscribed. This is because Winter School is open to the broad health and welfare community. Advance information is always sent to registered students but places are allocated on a first-come first-served basis. You may wish to share the Winter School programme with work colleagues who are not registered for the programme, as they are welcome to attend Short Courses. They will however have to pay the prescribed fees.

**Cancelling Your Booking:**
We urge you to let us know in advance should you decide to cancel your attendance. When students cancel at the last minute or simply do not arrive, they deny others the opportunity to attend. Please be considerate to fellow students and SOPH colleagues, as resource materials, venues and refreshments are planned around your attendance.

**STUDY PERMITS, MEDICAL INSURANCE AND SUMMER/WINTER SCHOOL**

**Study Permits:**
No study permits are required to attend Summer or Winter School. You will need a Holiday Visa.

**Medical insurance:**
You are advised that the SOPH and UWC will take no responsibility for medical expenses incurred by those attending courses on our campus. Citizens of other countries attending Summer and Winter School courses are required to have Medical Insurance, and to send evidence in advance in order to be able to attend Summer or Winter Schools; similarly, South African students will be required to take care of their own medical expenses.

**Paying Fees at Summer School:**
Those who attend Summer School in February usually pay their programme fees at UWC. The disadvantage is that registration still takes a few days and, until you are registered, you are denied access to certain UWC facilities, e.g. online materials, the library.
6 ADMINISTRATIVE MATTERS

</thead>
</table>

6.2 PAYMENT PROCESS AND STARTING YOUR STUDIES

For those in their first year with us, we have resolved to process all online registrations ourselves. So please do not do it yourself. Consult Janine Kader for assistance.

Bear in mind that delayed payment delays the start of your studies. Aim to have access to your study material and to be working towards your first assignment by the 17th of February for the absolute latest. This means that your fees must be paid before 15 January 2020. All of
these processes take time, so you must read the following carefully and try not to contribute to delays.

- You were sent your Student number by Janine Kader at SOPH; it is different to your Applicant number. Phone if you have not received it by now. If you have not submitted your SAQA Certificate, a student number cannot be generated.
- Late payment means a delay in registration and further delays accessing your study materials, which will jeopardise your progress.
- A memo detailing the registration process has been sent to you. Please consult it.
- If you change your mind about one of the modules after you are registered, there are two opportunities to make changes: see section 6.5.
- Be aware that you must register every year that you intend to study, and you must inform the Student Administrators if you do not intend to study for a year. The SOPH Student Administrator will facilitate the registration process for you on campus but it is your responsibility to make sure that you are registered in time annually.

**Study Permits:**
No study permits are required because the courses are offered at a distance. To attend Summer or Winter School, apply for a Holiday Visa, as you would for a conference. You must, however, send us evidence of Medical Insurance in advance. This can, in many instances, be purchased when you buy your air ticket. For students who choose to live in South Africa during their studies, a study permit and medical insurance are required.

**IN SUMMARY, DON’T FORGET TO …**
- Pay your Minimum Initial Fees as soon as possible.
- When you deposit fees, make sure that your surname, initial and Student Number are on the bank deposit form or cheque, otherwise your payment cannot be allocated to your account.
- Keep a copy of your receipt of payment, and all transactions and communication with SOPH.
- Scan a copy of these receipts to the Student Administrator at SOPH, asap.

### 6.3 FEES AND BANKING DETAILS

**Pay your Initial Minimum Fees before the end of 2019:**
It is risky to wait until January 2020 to pay your fees. Firstly, the December holidays and the start of a new year is an expensive time for many of us. Secondly, SOPH cannot register you without having first received your study fees. Thirdly, you will not be able to access your study materials if you have not paid your fees and registered. Finally, nothing will be processed at UWC between 23 Dec 2019 - 3 Jan 2020. So ... try to make payment before 15 Jan 2020 to avoid delays.

**International students with African Country Citizenship:**
All students who have permanent citizenship of an African country will pay the same tuition fees as South African citizens, unless the modules for which they are enrolling are offered at a higher fee, e.g. Nutrition modules.

**International students without African Country Citizenship:**
International students without citizenship of an African country will be required to pay the international fees as published by UWC. This amount is much higher than the African citizen fees.
**Fee payment by International students:**
Both categories of international students are required to pay the full tuition upfront, for every year of registration. The registration fee is payable annually.

**All students should budget for the following costs:**
- Registration and Tuition Fees (the latter will be per module)
- Bank charges for transferring the fees to UWC
- The cost of travel, accommodation and subsistence if you attend Summer and/or Winter Schools. It is optional, but highly recommended that you attend Summer and/or Winter School - if you have the means and resources to do so. Attendance for Descriptive Epidemiology (PG Diploma 1st years), Measuring Health and Disease II (MPH 1st years), Qualitative and Quantitative Research (MPH 2nd years) at Summer School is highly recommended
- Mini-thesis related fees including the annual penalty fees you will need to pay if you take longer than the allocated period. It is also a good idea to budget for a professional proofread to review your mini-thesis before you submit it for examination. Examiner’s often pick up grammatical and spelling mistakes which they inevitably recommend be corrected before you submit the final version to UWC for dissemination. It is thus easier to have a professional proof reader give your mini-thesis a good edit before you submit for examination.
- Prescribed books (if applicable to the modules you are taking).

---

**Note:** please see the more detailed correspondence about your fees for 2020 that you would have received from Janine Kader. This was circulated to you via email on 13 December 2019, and contains important information about the cost of the various components of the programme you have been accepted in - along with the necessary UWC and SOPH bank accounts.

Email details of your payment: Please email the evidence of your payment to the following email address: finance@uwc.ac.za and soph-comm@uwc.ac.za so that the student administrators can follow up if there are any problems with tracing your payment to ensure accurate and timeous processing of your payment.

Telephone: 27 21 959 2479 / 3392
Fax: 27 21 959 1556 / 2986

Please remember to use your student number (not your Application number) as a reference when you make your deposit; your deposit is untraceable otherwise. Please take note that YOU must pay bank charges when you pay your fees.
International students:
Please note that in addition to sending your proof of payment to the SOPH (Email: soph-comm.ac.za) you must also send proof of payment to the University’s Finance Foreign Payment section in order for your payment to be traced. This will ensure that there is no delay in your monies appearing in your student account.

Here are the contact details of the UWC Finance Foreign Payment section:
Fax: 27 21 959 1556 / 2986
Telephone: 27 21 959 2479/ 3392
Email address: finance@uwc.ac.za

On the form you will fill at the bank, be sure to complete Field 70: this includes your student number, surname and first name, e.g. Brown, John Malcolm.

Please note: At this time of year, Finance is busy with residential students; if you do not fulfill these processes, your application will remain in a bank account unnoticed. So please take these guidelines seriously.

6.4 FINANCIAL ASSISTANCE

Bursaries:
Applications for bursary assistance can be made through Mr Ebrian Johnson, UWC Financial Aid Office, 021 959 3338 or ejohnson@uwc.ac.za. usually before September of the previous year.

Loans:
Working South African students can apply to finance their studies through FUNDI (previously called Edu-Loan), which requires no deposit; interest rates of prime + 1% interest are charged, and students pay back loans on fixed installments.

Contact Ms Pamela Mtshakaza, Customer service Consultant at (Email): pamelam@fundi.co.za. Alternatively you can call her on (021) 951 6552 or (021) 951 5673. Alternatively you can call 0860 5555 44 or visit 073 551 9582 or visit www.fundi.co.za.

6.5 AMENDING YOUR ENROLMENT OR CANCELLING REGISTRATION

Once you have paid your fees, and registered for your modules, your study materials will be accessible on iKamva (including an Academic Handbook). You will then be committed to paying for all the modules, unless you formally withdraw by the date specified below. Send written requests to de-register to the Student Administrators at SOPH.

If you find that you have over-committed yourself, you can formally de-register. There are two very good reasons to formally de-register:

- You can save on fees if you send your notice to de-register on time for Semester 1 modules; for Semester 2, you may formally deregister If you miss the official dates, you will still be liable for fees for the modules you registered for, even if you do not complete them.
• If you formally deregister in time, these modules will not appear as an “incomplete” on your academic record for 2020.

Please also be aware that if you decide in the course of a year that you are not able to study in the following year (for whatever reason), you must notify the SOPH Student Administrators in writing by mid-November of that year by completing a leave of absence form.

If you do not apply for such a leave of absence you will have to re-apply to the programme the following year by doing an online application. Re-applications should be with us by 31 August 2020. This Re-application Form can be obtained from the SOPH Student Administrators.

**DEREGISTRATION DATES FOR MODULES, 2020**

To withdraw from a module, i.e. to de-register, do so by writing to the UWC Student Admin (c/o SOPH).

**SEMESTER 1 MODULES:** You may cancel your registration for one or more modules in writing: **to be confirmed**

**SEMESTER 2 MODULES:** You may cancel your registration for Semester 2 modules in writing: **to be confirmed**

Please do not overlook this process - it can be costly if you miss these deadlines!

6.6 REGISTERING IN YOUR SECOND AND SUBSEQUENT YEARS

Once registered, you do not have to fill in another Application Form or pay an Application Fee (if applicable) unless you suspend your studies for a year. You must, however, complete your online registration for each year you study and pay the Registration Fee.

If you are a Postgraduate Diploma student who has applied for and been accepted into the MPH, you should make an online application again. All applications will be processed through a SOPH Selection Committee.

*How long can you take to complete your qualification?*

The rules under which you register will apply throughout your studies, unless rules change during the course of your studies. In this case, you will be asked whether you wish to change to the revised rules or remain on those under which you first registered.

The rules indicating how long you may take on each of the qualifications are outlined in this section of the SOPH Programme Handbook.

*What happens if you do not fulfill the progress rules?*

The academic rules also specify *Rules of Progress* which indicate the minimum number of modules you must pass per year. If you do not comply with the progress rules, which you will find under the relevant qualification below, you will be academically excluded; you must then submit a *Letter of Motivation* to SOPH. Your explanation and motivation will be considered by a team within the SOPH and based on the merits of your case and your progress to date your request supported or declined by SOPH. Re-admission
applications will be submitted to the Faculty and Senate Higher Degrees Committees who may or may not give the final approval. Fee penalties will be applicable.

<table>
<thead>

</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2 years</td>
<td>You must have 40 credits (ie. 2 modules of 20 credits each) at the end of year 1 to proceed to year 2.</td>
</tr>
<tr>
<td>Master of Public Health</td>
<td>3 years</td>
<td>You must have 45 credits (3 modules) by the end of Year 1; 75 credits (5 modules) by the end of year 2.</td>
</tr>
</tbody>
</table>
|                                      |                          | Note: from the 4th year (and any additional year taken to complete your MPH) you will be obliged to pay for:  
|                                      |                          | • registration, and  
|                                      |                          | • the Mini-thesis penalty fee. for each subsequent year beyond the first three. |
| PhD/Doctoral thesis                   | 5 years                  | If you take an additional year for the PhD – there will be financial penalties. This means that from the 6th and subsequent enrolment for Doctoral students, you will be liable for the prescribed annual registration fee and annual penalty fee. |

Please note that it is usually the Mini-thesis which delays students’ completion of the MPH. If you would like to take a look at these rules, please access them from the UWC website.

**WHAT TO DO IN THE FOLLOWING SITUATIONS ...**

- **You have been academically excluded because you do not have enough credits to progress:** Submit a motivation to SOPH immediately after receiving your results; SOPH will consider the application and submit it to the Faculty and Senate Higher Degrees Committee, whose decision is final.

- **You are not finished your MPH in 3 years:** Write a motivation letter with realistic timelines to completion to SOPH by October; it will be submitted to Faculty and Senate Higher Degrees Committee; if they accept it, you must pay a mini-thesis penalty fee for the 4th and any additional year. After a 4th year, you are unlikely to be accepted back into the programme.

- **You wish to suspend your studies for a year:** Motivate to SOPH in writing
by November why you need a leave of absence; a year later, make an online application before the end of August for reinstatement.

- **You have taken a year’s break (or more) between qualifications, and want to apply for a higher qualification:** Follow the usual Application procedures before the end of August. Your application will be considered by a SOPH Selection Committee alongside other applicants.

Approval to resume studies is at the discretion of the SOPH and Faculty and Senate Higher Degrees Committee. Please contact the Student Administrators if you have any questions about re-registration.

### 6.7 GETTING YOUR STUDENT CARD

Each registered student is entitled to a student card. This card is required to enter the UWC campus, the UWC library, the Postgraduate Centre on Level 13 of the UWC Library and other facilities available on campus. It may also give you cost concessions for travel and some recreational clubs and events.

### 6.8 MODULE EVALUATIONS

At the end of each semester, we ask students to evaluate the modules they have studied, as well as SOPH’s administration and support to students. We use this feedback to improve the modules and the support we offer. We urge you to respond when asked; it is mandatory in the quality assurance system for higher education in South Africa, and students have in the past tended to ignore this request. In addition, future students will benefit from your feedback. So, while you study, keep notes of difficulties you have had, as well as ideas on how we might improve the modules. We take this advice very seriously, and you can submit the evaluation anonymously.

We will also send other specific evaluation requests from time to time. Again, we urge you to participate, and help us to improve the programme for the sake of future students. We appreciate your comments, both positive and negative and we are known to act on them!

### 6.9 USING YOUR UWC E-MAIL ADDRESS i.e. gmail

For correspondence with SOPH you will need to use your UWC gmail account (see UWC’s new policy). This gmail address will be assigned by UWC using your student number. It will take this format: studentnumber@myuwc.ac.za. If you were a student at UWC before, your student number will remain the same. Some of you may already be using gmail, so this will be a second gmail address. Using gmail will have some distinct advantages; allowing you to use educational Google applications beneficial to SOPH students such as Google sites (ePortfolio) and Google Drive for free cloud storage. The following are also general advantages anticipated in using gmail:

- Each mail box will be provisioned with 30 GB of space.
- Gmail is part of the total Google Apps package which you can then access.
- You will be connected to Google Calendar allows easy coordination of schedules or events online.
- Google Docs allows you and others to create and collaborate on documents
and spreadsheet together at the same time.

- If you save documents you are busy with on Google Drive, it will be easier to access your files either “in the cloud” or on your mobile device.
- Most Android Smartphones and Tablets have the Gmail application pre-installed and it requires a few steps to configure it for email access.
- Gmail has an excellent built-in anti-spam feature.

As a UWC student, and ambassador of the university, the Director of IT has requested that you observe and adhere to the policies and security measures associated with your Gmail account.

**How to access to your new Gmail and Google Apps Account**

1. Go to the UWC PORTAL and select the Email link at the top of the web page; or alternatively select the following link: http://www.uwc.ac.za/Pages/Email.aspx#.Uf-ssZIwfzw

2. Select the Gmail icon, which will direct you to the Student Gmail Login Page

Alternatively access the Google Apps (Gmail) account Login Page directly selecting the following link: https://www.google.com/a/myuwc.ac.za

**HOW TO SIGN IN TO YOUR NEW GOOGLE APPS (GMAIL) ACCOUNT**

1. **Email:** <your student number>@myuwc.ac.za

2. **Password:** for non-South African students <your Date of Birth (D.O.B)> in the format YYYYMMDD. i.e. 8 June 1987, will be entered as 19870608 Select the Sign In button for South African students, use your 13 digit ID number and select the Sign In button.

**NOTE:** If you do not enter your student number in combination with @myuwc.ac.za or your date of birth (yyyymmdd) the following error message will appear: “The username or password you entered is incorrect.”

**IF YOU WANT TO CHANGE YOUR PASSWORD**

1. Select the down arrow next to your email address in the top right hand corner of the webpage.
2. This will expand into the account management dialogue box. Select Account
3. The Account Web Page is generated. Select Manage Security, under the Password heading.
4. Google generates the Security webpage. Select Change Password
5. The Password Self Service screen is generated. Under username enter your student number and your D.O.B as current password. Select Login button, and proceed to change your password.

**NOTE:** A preferred complex password would contain Uppercase (ABC), lower case (abc), special characters (!@#) and alphanumeric characters (1q2W). e.g.
This second password change is for your own protection!

It ensures that your email remains strictly private for your own use. Your Date of Birth password can be easily guessed by your friends or your lecturer! Do not compromise the privacy of your student email account.

6.10 KEEPING IN CONTACT - YOUR RESPONSIBILITY

It is of the utmost importance, a UWC rule in fact, that we and you use your UWC email address for communication related to your studies. Without checking into your uwc email on a very regular basis, you may not receive crucial course information. It can also be time-consuming for the SOPH Student Administrators to try to contact you. Should you experience problems in accessing your student email, contact servicedesk@uwc.ac.za and provide them with your student number and date of birth.
6.11 STUDENT DETAILS UPDATE FORM: SCHOOL OF PUBLIC HEALTH, UWC

7 RESOURCES AND STUDENT SUPPORT AVAILABLE TO YOU

These are the resources that you can use to support your studies:

- Module Guides
- Additional readings listed in the Module Guides (which you will find on the Internet)
- Module Readings
- Additional learning items, e.g. videos for selected modules
- Online learning platform
- SOPH Academic Handbook
- Summer and Winter School Short Courses
- Discussion Forums (non-synchronous)
- Contact with the Module Convenor/Lecturer by phone or e-mail
- UWC Division for Postgraduate Studies (DPS) incl (PET Project - Postgraduate Enrolment and Throughput Project) for academic support including training in the development of academic skills, possibly help with writing skills (to be confirmed) and mini-thesis (see section 7).
- Contact with your peers, fellow students and a mentor in your workplace.

We explore each one of the above resources in some detail below.

7.1 LEARNING RESOURCES

Module Guides:
You will mainly study through iKamva, the UWC electronic learning platform in which Module Guides, Readings and Additional Materials will be posted; and in specific cases, a prescribed book. The Readings are cross-referenced from the Study Sessions in the Module Guide. At the beginning of each Module Guide, you’ll find a Module Introduction outlining the course and contact details of the Module Convenor/Lecturer. In most modules, you will also find the assignments in the Module Introduction unless otherwise directed.

You will also receive an electronic copy of the SOPH Academic Handbook which discusses academic skills guidance and some strategies for active studying. Explore this book before you start studying.

Additional Media and References
All study materials will be on the iKamva learning platform. Note that some of the modules also require you to buy prescribed books which are noted in the introductory section of the respective modules.

Prescribed books:

PG Diploma in Public Health prescribed books
There are two prescribed books that you will need for your PGD studies. They are listed in the table below. We have only ordered copies of the first book which you will be using for the Population, Health and Development I module. In order to receive a copy of this book, please pay R 200 into the SOPH bank account (see details below) as soon as possible.

When making a payment for this publication remember to:
- Deposit the R 200 into the SOPH account and not into the UWC account.

[Continued on next page]
• When making a deposit into the SOPH account make sure that it reflects your student number, surname and initial as a reference (see additional details below).

Please take note that you will have to order the other prescribed book yourself and we suggest you do this immediately given the delivery of books can take approximately 4 weeks, even via the internet.

<table>
<thead>
<tr>
<th>PG DIPLOMA IN PUBLIC HEALTH: PRESCRIBED BOOKS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Module</td>
</tr>
</tbody>
</table>

**Master of Public Health: Prescribed Books**
Students are required to access the following 3 prescribed books (see table below) - with 2 of the 3 prescribed publications requiring that you purchase them yourself.

Please be aware that the books you have to purchase might be available in an e-version and you might find that an easier option to consider.

If you choose to purchase a paper version of the books, please order these as soon as possible given the delivery of books can take approximately 4 weeks, even if you have purchased it from an online provider.

At MPH and PG Diploma level, you are expected to read beyond the materials provided. You will be given references for further reading, articles, books and websites in the Module Guides.

**Using the Internet:**
For all your MPH modules you will be required to search for some of the necessary literature over the Internet. The module convenor will provide you with the website
links to use to search for overall core module articles and articles specific to Units. You will need to go to these websites and download the prescribed articles. It is often better to copy and paste the URL link into an Internet web search and then follow the search for an article rather than click on a highlighted link provided in the Module Unit. Apart from searching for articles that have been prescribed for your module, you will need to be able to independently search for relevant literature. For example in the Public Health Research (PHR) assignment 2, you write the assignment on a potential research topic of your choice. For the literature review section of the assignment, you will need to use the methods in which you will be trained during the PHR module to search on the Internet for literature and materials for your own specific literature review.

During your MPH studies, you need to find a place where you can have very regular access to using the Internet. You will develop the skills to efficiently to search for literature. The UWC Library website is very helpful in doing so, as is Google Scholar and a search engine called PubMed. There are several other search engines that exist. You can use the methods you will learn during your PHR module to do your literature searches via Internet search engines. Don’t be daunted by this, you will receive training and practice in doing this, during your MPH course.

7.2 ATTENDING SUMMER AND WINTER SCHOOLS IN CAPE TOWN

A good way to kick start your studies is to attend the Short Courses offered at the UWC Summer or Winter School. You are entitled to attend Summer or Winter School Short Courses for most of your registered modules. They cover some of the content of the distance learning modules. Attending a relevant Short Course is beneficial but in recognition of financial constraints, it is not compulsory. It is however strongly recommended for Descriptive Epidemiology (PG Diploma) and for the MPH courses - Measuring Health & Disease II and for the research courses Qualitative and Quantitative Research Methods. To attend a Short Course, ensure that you book your place before the closing date. (See also Section 5.4 which provides more details on the Schools).

7.3 TAKING ADVANTAGE OF LECTURER SUPPORT

Contacting your Lecturers:
Should you have any difficulties with a module, you are expected to contact the Module Convenor/Lecturer for that module. You can do so by e-mail, SMS or telephone. Their contact details are provided at the back of this Handbook and in your Module Guide.

Sending Draft Assignments:
Another important way to get support is to prepare a short draft of your assignment and to send it to your lecturer on the due date listed on an Assignment Schedule which will be sent to you by the Student Administrators. This process has been designed to give you feedback before you need to complete and submit your final assignment. A draft can simply be an outline of what you expect to do, or it can be used to check that your understanding of the assignment requirements is on track. You can then use the feedback you receive to finalise your assignment. No late draft assignments are accepted. There is more information about submitting Draft Assignments in Section 8.
**Linking up with a Mentor:**
A mentor is someone who is readily available to meet with you, and can assist you with planning your studies, assignments and helping you to access resources. It would be ideal if you could approach someone in your institution or district to act as a mentor. Mentors should have more knowledge and experience than you. Mentors are not involved in marking assignments and would not need to know the module content in detail, but would be able to act as a sounding board and advisor.

It will be largely left to you to choose and approach such a person in your home area. The time commitment by the mentor should not be no more than about two hours every second week, and discussions should be held at a time and place that suits both of you.

**Forming a Student Study Group or Network:**
On request, you will be provided with the contact details of other students registered for the same course, who live in your area. You are encouraged to meet, or to e-mail, fax or telephone each other. Study groups or peer groups have been shown to be powerful mechanisms for enhancing learning and sustaining motivation while studying at a distance. You are encouraged also to use the SOPH Online Discussion Forums as a means to network with your fellow students for mutual academic support.

---

**7.4 DEVELOPING YOUR OWN STUDY SKILLS**

While studying at SOPH, you are encouraged to improve your ability to read academic texts, write successful assignments, and develop many other academic skills which will help you to be a successful student. The following are some options offered to improve your academic ability:

- Ask for help when you need it from the Module Convenor/Lecturer, for example by submitting draft assignments and using the feedback to guide you.
- Use the **SOPH Academic Handbook** which will available on iKamva.
- Attend the academic skills sessions offered at Summer and Winter School.
- Request assistance from SOPH staff and the librarian when you visit UWC. Please make such arrangements in advance.
- Contact UWC’s postgraduate academic development division called the Division for Postgraduate Studies. You will find details below in 7.4.1.

---

**7.4.1 Division for Postgraduate Studies & The Writing Centre**

If you are an MPH student and busy with your mini-thesis - and believe that you could benefit from additional support in relation to the quality of your academic writing, then we would encourage you to make contact with the UWC Division of Postgraduate Studies.

*The Division for Postgraduate Studies (DPGS) [previously known as the Postgraduate Enrolment and Throughput (PET) project] provides academic support to postgraduate students. The DPGS assist postgraduate students with acquiring research skills such as academic writing, research methodology and data analysis.*

https://www.uwc.ac.za/Students/Postgraduate/Pages/default.aspx

The following services are offered by the DPGS:

- A Postgraduate Resource Centre on level 13 in the main library is a “quiet” space for postgraduate students to sit and write.
Research Development Programmes on Saturdays covering topics such as proposal writing, research methodology, writing the literature review, presentation skills and research funding opportunities and applications. Programmes are circulated at the beginning of each semester. If you wish to be included in the mailing list, please send in your request and details. The contact details are provided below. This will only be useful to students based in Cape Town.

Research software training - ATLAS.ti is a qualitative data analysis software which is useful in the analysis of large bodies of textual, graphical, audio and video data. SPSS - Software Package for the Social Sciences - is a software package which assists in the analysis of quantitative data. Software training programmes will be advertised via the UWC communication emails.

Communication literacy: Excel presentations (working with tables and figures in your thesis); Working with large documents; PowerPoint presentations.

Information literacy: Literature support from the Faculty Librarian. In addition to this, library training for postgraduate students will be advertised via the Library User Education Programme and the DPGS yearly research development programme schedule. In The library programmes focuses on resources and information relevant to the group, e.g. online databases, online journals and other services in the library, which all postgraduate students may find useful e.g. interlibrary loan.

One-on-one writing and qualitative/statistical coaching services are available in the Postgraduate Resource Centre (Level 13 in the library). For one-on-one writing and qualitative/statistical coaching services please follow the instructions provided in the box below. For those students living outside Cape Town, DPGS offer online academic assistance.

The Division for Post Graduate Students

The Division for Post Graduate Students (DPGS) is positioned to offer academic assistance to post graduate students using DPGS coaches. All coaches are PhD students. The coaching services are free and exclusively for Masters and PhD students. The coaches provide comprehensive academic assistance focusing on academic writing skills and statistical analysis. Post graduate students in need of coaching assistance can use the link below to request a coach. A coach will be assigned and will contact the student within 24 hours.

https://form.jotform.com/51601578349965

For further assistance please contact: Dr.Olushola Adeniyi oadeniyi@uwc.ac.za

If you are (a) a PGD student or (b) are in your first or second year of your MPH and busy with your core or elective modules - and feel that you could benefit from a bit of additional support in relation to your academic writing (eg. if you are struggling to structure your response to an assignment question or synthesise the various ideas you have into a coherent argument - or would just like some help in establishing more of an academic tone in your writing), then we would like to suggest you make contact with the UWC Writing Centre.

It is important for you to be aware that the UWC Writing Centre does not provide an editing service but will provide you with developmental feedback on a draft of your
assignment that will assist you to rework it before submission.

**How to make contact with the UWC Writing Centre:**

Send an email request for assistance to Genevieve Daries (gdaries@uwc.ac.za), copying Arona Dison (adison@uwc.ac.za).

In your email, we suggest that you provide Genevieve with the following information:
- describe what you specifically would like assistance or guidance with (or what you are concerned about) in relation to your writing
- provide your student number and your contact telephone number
- provide the name of the module and the module code that you are doing/requesting writing help with
- provide the deadline for when the assignment has to be submitted, and
- send the assignment question(s).

Attach the draft version of your assignment.

Genevieve will respond to your email and then allocate you to one of the Centre’s postgraduate tutors, who will give you written feedback using the MSWord comment function and then email your draft version of your assignment back to you.

Note:
*The turn-around time is approximately a week, depending on the length of the document, and the pressure on the UWC Writing Centre at the time.*

*This will mean that you will need to work ahead of time to allow for the Writing Centre to review your work and for you to spend some time revising your assignment based on their feedback.*

Remember: your *Academic Handbook* and the Academic Literacy Resources on the iKamva online learning platform will also assist you in gaining these skills!

#### 7.5 USING THE UWC LIBRARY AND ITS ONLINE RESOURCES

Have you thought about what learning resources are available to you as a student at the UWC and the School of Public Health?

When studying at postgraduate level, it is not sufficient to use general internet websites, and certainly not Wikipedia for information for your assignments. They are not considered “scholarly” within the academic context.

You have therefore been given, through the UWC Library website, access to a large range of very useful Academic Databases (which in turn contain an enormous amount of academic resources, including journal articles). Academic Databases are like online academic libraries: they contain a wealth of academic papers and books across a range of different disciplines - all of which has been neatly catalogued. The good news is that most of the public health related articles (and some of the books) you will be looking for during your studies, for example, for further reading around an assignment or when
you are developing your protocol for your mini-thesis, will be available for free on one of these academic databases.

So whilst we have provided you with a set of core and mandatory readings for each Module - you will, during the course of your studies also be encouraged to read beyond these core texts - and the library will be a welcome resource for your further reading.

As one of our colleagues suggested:

“Knowing how to access other written resources (in libraries and on the Internet) is an essential part of being a post-graduate student, a researcher and a Public Health practitioner. Instead of feeling left behind, empower yourself now and take control of the opportunities that your university and e-technology can offer.”

Where is the UWC library located?

Although the library is physically located on campus, the majority of the academic literature that you will need for PGD or MPH studies is available online. Increasingly we are also ordering all the new public health books as e-books - so as a distance learner you can figuratively visit the UWC library anytime you want. There are no opening and closing times - it’s all at the end of your fingertips!

“The only thing that you absolutely have to know - is the location of the library.”

Albert Einstein.

Here are two important links to help you get orientated to the UWC library:

- The UWC library website homepage is located here: [http://lib.uwc.ac.za/](http://lib.uwc.ac.za/)

- A Library Guide, specifically created for all of our distance students, will assist you to understand how to use the different tools on the library website so that you can access all of the e-resources: [http://libguides.uwc.ac.za/c.php?g=439983](http://libguides.uwc.ac.za/c.php?g=439983)

You can also access the “School of Public Health - Distance Students Library Guide” from the homepage by going to: “Quick Links” on the right side of the website, then to “Subject Guides” and then clicking on “School of Public Health - Distance Students Library Guide”.

How can the “School of Public Health - Distance Students Library Guide” assist you?

This is some of what the Library Guide will be able to assist you with:

<table>
<thead>
<tr>
<th>Tab</th>
<th>Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>Welcome and Getting Started</td>
<td>• The contact details of our Faculty Librarian, Ms Karen Cook</td>
</tr>
<tr>
<td></td>
<td>• A step-by-step orientation guide that will help you to log onto the library website and start to look for relevant academic literature.</td>
</tr>
<tr>
<td></td>
<td>• Who to contact if you experience problems with logging into the UWC library website.</td>
</tr>
</tbody>
</table>
| Finding Information | • Search uKwazi (the library catalogue) to find information in different types of sources, for example, journal articles, books (print and e-version), newspaper articles, theses and dissertations.  
• A list of the latest books that the SOPH has purchased in 2018 and 2017. Some of which are e-books which makes access for distance students very easy. |
| Search for Journal Articles | • Links to all recommended databases that we suggest you start browsing for public health related literature on a specific topic. |
| Browse Health Websites | • A list of websites that have links to public health issues and which the SOPH thought you might find useful to know about. |
| FAQs | • Some of the common questions that we find students have asked us about the UWC library and how to find specific journal articles and books. |

**How do you log onto the UWC library website?**

The Library website will automatically detect Off Campus users and will thus prompt for your Novell Username or Password (your Student Number) or Password (date of birth - yyyymmdd) or passport or ID number when required. This generally happens when you start using a database - at which point you will be prompted to authenticate yourself using the above details.

If you encounter a problem logging onto the databases please contact:

• the ICS Service Desk at servicedesk@uwc.ac.za or phone (021) 959 9557, or
• the e-Resources Librarian (Anne Moon) at amoon@uwc.ac.za or phone (021) 959-3016.

Please provide our colleagues with your student number, date of birth and ID or passport number.

**Who can you ask for guidance about using the library and the resources within it?**

Our Faculty Librarian, Ms Karen Cook, can assist you with technical advice and suggestions about how best to look for academic resources within the UWC library. She cannot, however, do an actual literature search for you. That is your learning process - and if you request that Karen find literature for you she will politely decline!

Karen is available to support you as you explore the UWC library online and can be contacted at the following numbers:

Telephone: +27 21 959 2684  
E-mail: kerasmus@uwc.ac.za

Please allow for a 2 day turn-around time for Karen to get back to you with a response
to your question.

Do you have a question? Ask Karen Cook, our Faculty Librarian!
We also have an online communication link with the Library called “Ask our Librarian” where you will be able to send Karen Cook a message directly through iKamva.

You will find the link to this service on the following iKamva sites:
PGD Communication 2020
MPH Communication 2020

If the above links do not take you directly to this service, go to the relevant Communication 2020 site and:
• Go onto “Ask the Librarian” tool which will be on the navigation bar on the left,
• When you click on this tool a chat platform should open up where you can type your question to our Faculty Librarian and then send it off by clicking on the blue arrow in the chat box. The blue arrow to send will only appear when you start texting.

7.6 YOUR COMPUTER SKILLS

In order to study at postgraduate level, a range of computer skills will be needed. In the weeks before you start studying, you are urged to prepare for it, e.g. by getting a stable e-mail address and by learning to search using the Internet more effectively. We are aware, however, that getting access to the Internet for prolonged periods can be a problem for many students. Nevertheless, we strongly urge you to try to organize this access for yourselves: your studies depend on access to scholarly literature.
Below we outline the skills level that will be needed for this course and suggest some ways in which the difficulty of getting access to a computer might be overcome.

The essential computer competences that you will need are as follows:

a. Type assignments using a word processing programme (such as MS Word, Open Office).
   This has advantages for you too - it allows you to revise and edit your own work taking less time, and to receive feedback from your lecturer by e-mail.

b. Manage files and folders.
   Good housekeeping with regard to your files and folders, their titling and their location can save you lots of time. Set up a system in advance.

c. Send and receive e-mail; attach documents to an e-mail.
   We expect you to make use of e-mail for communication with the School, and to have a reliable e-mail address that you use regularly.

d. Use Excel spreadsheets.
   This will be a very valuable programme to use in your epidemiology courses, for capturing data.

e. Join and participate in Discussion Forums.
Increasingly, non-synchronous Discussion forums are being used to support our modules. Learning how to join and manage your membership is important to maximize the learning opportunity represented by this forum. Participation is compulsory for most.

f. Use the Internet to search for information
This can be learned at UWC, during Summer or Winter School.

g. Using Mendeley (a free programme on the Internet).
This will allow you to save the literature you find, and to reference the literature accurately.

The UWC Library offers regular training in finding information on topics of your choice using the Internet. If you are in Cape Town for Summer or Winter School, you will be offered a training session; if you are in Cape Town at another time, contact Ms Karen Cook Erasmus (kerasmus@uwc.ac.za) at 021 959 2684 to arrange a session.

Here are some of the ways in which past students have managed to strengthen their computer skills and use the library:

- Through your work supervisor, apply to do a computer course in Excel for example, at your workplace.
- Ask a colleague, a student (present or past), your son or daughter or friend to help you to learn a new programme or search for literature by following the instructions above.
- Ask a more experienced person to show you how to search for literature using the Internet. The same guiding programmes are on the Library website under Self-learning zone, if your Internet access is good.
- Using Google Scholar (not Google) can also be very helpful, but it contains far less than the databases.

7.7 GUIDELINES FOR USING IKAMVA, THE ONLINE LEARNING PLATFORM

As a student support strategy and to encourage interaction between students and lecturers, lecturers will be using iKamva, the online learning platform, for all SOPH Modules this year.

What is iKamva?
iKamva is the online learning and collaboration environment used by the UWC community. iKamva is used to support UWC courses, or modules, and project sites which are initiated by the community. The word “iKamva” means “future”, which refers to the way in which the social and technological developments are advancing and moving forward.

Why is iKamva used?
iKamva is an eLearning platform which accommodates different types of sites. Examples of types of sites are:

- UWC course/module sites: which allow the use of a range of different eTools such as eAssessment, communication and content creation.
- Project sites: which provide a central space for collecting and reflecting on project data by different community groups.

How do I log into iKamva?
- To log in to iKamva you need to open up your internet browser (e.g. Google Chrome or Moxilla Firefox are recommended. Please avoid using Internet
Explorer) and search for https://ikamva.uwc.ac.za. You will need to login using your student number as the username and your date of birth as the password. For South African students your password will be your full ID number. Step-by-step instruction on how to use Ikamva is in the SOPH Programme Handbook.

● Please note you can only access iKamva once your registration is complete.

To log in to iKamva you need to open up your internet browser (eg. Google Chrome or Moxilla Firefox are recommended) and search for https://ikamva.uwc.ac.za. Please avoid using Internet Explorer.

This should take you to the screen shown below. You then have to log in, if already a registered student, with your Student number (User ID) and if you are a non-South African student use your Date of Birth as the Password (format: yyyyMMdd) and South African students use your 13 digit ID number to access the course sites of modules that you have registered for.

Upon login with your correct details you should be able to see the screen shown below with two main toolbars: Home and Sites.
Home: Overview

Home is an individual online worksite that functions as a private workspace for each user. When you log in, you will automatically open Hom, which will display the Message of the Day and My Personal Workspace Information boxes. By default, these boxes contain announcements, the calendar, and information from the iKamva system administrator.

Key Features:
In Home, you can perform various tasks, including:
- Uploading files in your own private Resources tool. Material uploaded can be accessed on any device, wherever you may be as long as you sign in as yourself. You can save drafts or backup copies of work in progress in My Workspace Resources.
- Viewing an integrated Schedule for all course sites in which you participate.
- Viewing Announcements from all your course sites.
- Creating your own private Schedule items.
- Viewing a list of all sites you belong to in Worksite Setup.
- Revising worksites you own by adding users or changing tools.
- Choosing how you would like to be notified of new or changed items on sites you belong to in the Preferences tool.
- Adding yourself to publicly joinable sites with the Membership tool.
- In My Workspace, you can print a PDF file of all your Schedule events for the day, week, or month.

How we will use the iKamva sites:
- Note that there will be different sites for general communications from the student administrators, and modules.
- The Student Administrators will send you Programme notifications and Memos through the site; if it is for a specific group of students, the subject line will say so, e.g. Att Mini-thesis students; because you receive the announcement as an email, you don’t necessarily need to access the site to see the announcement.
All such communications will remain on the site: this means it will serve as a kind of filing cabinet.

For all Modules, lecturers will use the sites as learning tools - to clarify questions, for group discussions, to facilitate group tasks and for interactive learning. Students are often better at explaining difficult concepts to each other than lecturers are; so we encourage you as students to offer your capacity and experience to your fellow students by sharing insights and questions!

In using iKamva, please observe the following etiquette:

- No offensive or discriminatory content;
- No commercial messages;
- No invitations to join Facebook or Linked-in via the site;
- No assignments to be sent in this way;
- No sharing of the mailing list except for programme purposes;
- You may share interesting or important resources, websites or events via the iKamva Communication site;
- You may communicate problems or questions to other students, or link up with smaller groups if you wish to;
- **Important:** Do not hit the “Reply” button just to say thank-you! If you “Reply”, every one of us receives an email. This is bad practice as it fills up everyones’ email boxes. So even if you feel grateful, don’t just hit the Reply button!

**SOPH PGD/MPH Student Communication 2020 on iKamva: Overview**

This site is open to only Students, Lecturers and Administrators of the School of Public Health, UWC. By clicking on this toolbar you automatically land on the Home page which contains general SOPH announcements. This site will be used for communication purposes mostly by the Student Administrators, Corinne and Janine

All students, lecturers and student administrators will be added to the SOPH Communication site. The value of this site is that we can communicate with the whole group at one time, invite responses, and the conversation will be archived in one place (on the site) so that you don’t have to search through all your emails. So if you need the Programme Handbook in July, you can go to the SOPH Communication site and find it straight away!

**SOPH Module Sites**

The individual Module sites will contain all the information relevant to that module. The beauty of this facility is that everything is one place and can be accessed wherever you are as long as you have internet access. Each Module will include a Module Welcome, Learning Outcomes, Assessments, Study Schedule, Module Guide, Readings and any Additional Resources relevant to the respective module, such as videos.

Announcements pertaining to the module will be sent to students by the module convenor via the module site. Several modules have Discussion Forums and these will be lodged on the iKamva module site. In most cases participation in Discussion Forums is compulsory but we will inform you about them when you commence the module. In addition to this brief description of What and How iKamva will be used you can also watch videos to help you use the different tools including logging on to iKamva developed by the UWC Centre for Innovative Education and Communication Technologies (CIECT) [youtube channel](https://www.youtube.com).
8 ASSESSMENT

Every module is assessed and most of them are assessed through two assignments. There is more information about Assessment under each qualification section below.

Assignments are found on the Module’s Ikamva Site with the Module Convenor’s name and contact details. Assignment deadlines will be sent by the Student Administrators. The length and format of each assignment may differ and will be clearly indicated in the assignment instructions. All assignments should be typed and no hand written assignments will be accepted.

8.1 SUBMISSION OF ASSIGNMENTS

Submitting Assignments
We recognise that it may sometimes be difficult to submit assignments on time, owing to heavy workloads and family responsibilities. However, in the interest of fairness to other students, the staff’s marking schedules and the integrity of the marking process, you must adhere to deadlines as far as possible.

• Assignments must be uploaded to the iKamva online learning platform by the due date.
• If you should require an extension on the submission of an assignment please contact the student administrator at least two day before the submission date.
• Please always keep a copy of your assignment.
• Assignments should include an Assignment Cover Sheet. An electronic copy is available on iKamva.
• Make sure you include your student number.
General Guidelines for Presenting Assignments

Follow these guidelines every time you submit an assignment

- You have to submit your assignments via iKamva.
- You have to log onto iKamva using your student credentials (Students number and password) to submit your assignment.
- When submitting an assignment you have to go to the module site (clicking on the Sites on your toolbar you will see all the modules you are registered for). Please ensure that you are on the correct module site for the assignment you are submitting.
- You have to use the Assignment eTool on the left on the navigation bar on your module site to submit the assignment.
- On the Assignment eTool a list of assignments due will appear (Draft Assignment 1; Final Assignment 1; Draft Assignment 2; Final Assignment 2). You have to select the assignment you wish to submit and detailed instructions will appear once you have made your selection.
- Finally, please remember to upload your assignment at the bottom of the page clicking on Submit.
- Refer to the PowerPoint step-by-step instructions on iKamva to guide you through the assignment submission process. If you should encounter any problems, need clarification or guidance please do not hesitate to contact Ziyanda.
- Marked assignments will be loaded onto the same site where you have submitted the assignment and you have to download the marked assignment. You can expect feedback within 2-3 weeks of submission dates.
- Please take note that Assignment 2 Final Feedback will take longer as these assignments are sent for moderation and the marks can only be released once the moderation process has been finalized.

Assignment requirements

- Your assignment has to be submitted in a A4 format, 1,5 line spacing, and in 12 pt Times New Roman font type and font size.
- Handwritten assignments will not be accepted.
- Keep to the recommended length. Excessively long assignments may be penalised.
- Number ALL pages.
- Only MS Word versions with a cover sheet will be accepted as assignments. Include the Assignment Cover Sheet (completed fully) as the first page of the assignment, i.e. the cover sheet and the assignment must be one document.
- Always put your name on every file you send, and label the file correctly, using these instructions as a guideline if submitting by e-mail:
  - Your Name (Surname, Initial) e.g. Mambwe R
  - Module abbreviation (see Programme Handbook for Core module abbreviations). Use CAPITALS, e.g. PHC II
  - Assignment number, e.g. 1 or 2, and Draft or Final
  - The year, i.e. 2020
- e.g. Mambwe R, PHC II Asn 1 Final 2020; Mambwe R, PHC II Asn 1 Draft 2020.
PLEASE use the same surname that you officially registered with. Using a different surname will cause unnecessary confusion and delays.

<table>

For more Electives, please abbreviate titles so that they are easy to recognise at a glance, e.g. QRM for Qualitative Research Methods.

Poorly labeled files assignments will be returned to you for re-titling.

**Draft Assignments**

As you are studying at a distance, lecturers will provide feedback on a Draft of your assignment. In your assignment deadline schedule we have given due dates for Draft Assignments; no late drafts are considered. Allow 14 days for your lecturer to return your drafts. If you experience delays in getting feedback, please inform the Student Administrators. Though it is not necessary to send the whole assignment as a draft - it can be work in progress; please ensure that you have addressed the difficult parts of the assignment and ask questions. Draft assignments are key to ensuring that you are on the right track and provides the lecturer the opportunity to provide guidance towards the successful completion of the assignment.
8.2 FEEDBACK ON ASSIGNMENTS

The various Module Convenors /Lecturer have different approaches and styles to providing you with feedback on your draft assignments. This process has been designed to provide you with an opportunity to receive feedback from the Module Convenor/Lecturer on two critical aspects of our assignments: firstly, on the tone of your academic writing; secondly, on the technical aspect of the assignment. Please take into consideration that marking is subjective, based on a rubric and assessment criteria thus you could receive different types and detail from different markers and conveners depending on the module. Furthermore, given this is a post-graduate programme we have an expectation that our PGD and MPH students are gathering information and feedback from a range of sources - and not only relying on the feedback they get on their draft assignments.

Engaging with this feedback is one of the ways for you to learn in distance education. If you do not understand the feedback, you are urged to contact your lecturer. If you receive feedback on a draft assignment and do not use it in the final assignment, you can expect this to be reflected in your final mark.

8.3 OTHER IMPORTANT INFORMATION RELATED TO ASSIGNMENTS

Extensions on the Submission Date:
Aim to submit all assignments by the due date. Extensions may only be granted under special circumstances if negotiated timeously through the Student Administrators, not the lecturers. If you are granted an extension you will get an extension of no longer than one week. **No extensions will be given for Draft Assignments.**

Consequences of Late Submission:
Late submission of assignments has consequences for you and the staff of the SOPH including:
- You will start your next assignment late, affecting the time you have for it, and potentially the quality of your work.
- Lecturers’ time and marking schedules are disrupted.
- SOPH will be unable to submit assignment results timeously: this could mean you having to repeat the module and pay fees twice.

Return of Marked Assignments:
The return of marked final assignments is within three to four weeks of the hand-in date. SOPH’s lecturers are committed to trying to return assignments on time. If you experience long delays in getting feedback, please inform the Student Administrators.

Should you be dissatisfied with your marked assignment there are you mechanisms in place through which you can query the mark:

For Assignment 1

You can apply via the SOPH Student Administrator for a review of your mark within one week of receiving your mark - at no cost to you where a different marker will subjectively review the mark you attained but please take note that the reviewer's mark is final even if it is less than the original mark attained.
For Assignment 2

You can request a re mark of your Assignment 2 via the UWC Student Administrator at a cost where the external marker appointed will be requested to objectively remark your Assignment but please take note that the external marker’s mark is final even if it is less than the original mark attained. You have to apply online within five (5) days of receiving your final mark for a re mark: https://form.myjotform.com/90072612216548.

Should you be dissatisfied with any other aspect of the assignment please contact your lecturer/convener directly.

8.4 ACADEMIC DISHONESTY/CHEATING, PLAGIARISM AND POOR REFERENCING

Plagiarism or using other peoples’ ideas, words and work without acknowledgement is a worldwide problem and one which we take very seriously. At higher education level, you are expected to make use of the work of others - in particular, experts - in substantiating and developing your own arguments. However, when you use someone else’s ideas and words, you are expected to indicate this by citing the source correctly. This practice is not the end goal of academic writing, it is simply the most basic convention, which demonstrates the evidence upon which you are building your argument. Ignoring the convention is very naïve, and shows ignorance of the whole scientific enterprise. Please note that:

a) We expect you to reference other peoples’ work every time - whether it is their words, or just their ideas.
b) We expect you to reference accurately.
c) We expect you to reference consistently, i.e. in the same manner, using the same style, throughout your assignment.

To enforce these expectations, you will be penalised for poor referencing, plagiarism, and cheating in your assignments.

Please consult the Academic Handbook for definitions and examples of these terms. Referencing is not a skill that anyone is born with. One simply needs to follow the guidelines.

Cheating - academic dishonesty and plagiarism

The University of the Western Cape Plagiarism Policy defines plagiarism as follows:

Plagiarism is (a) the appropriation of formulations, ideas or words from the work of another person without acknowledging the author(s) and the source; and (b) the appropriation of work from someone else’s assignment, thesis, test or research paper without acknowledging such other person and/or source (University of the Western Cape, 2011: 1).

Using text from a book, journal, SOPH Module Guide, Internet, or any other document or someone else’s assignment, thesis, research paper or exam without acknowledging
the author or source to obtain credit constitutes plagiarism.

Although it is difficult to draw the line between plagiarism and academic dishonesty, the latter involves the intention to deceive the reader. Both involve some or all of the following practices:

- Lifting a distinctive piece of text, a phrase, a sentence, paragraph or an idea from another’s work to use as your own, without indicating that it is quoted and without acknowledging the author or source.
- Using another author’s idea without acknowledgement, even if you have put it into your own words.
- Only slightly changing the text, citing the source, but NOT using quotation marks.
- Copying from another student’s assignment, examination script or mini-thesis.
- Collaborating with any person during an assignment without due authority. Collaborating is taken to mean the actual execution of the assignment (and not discussions you may have had prior to starting the assignment).
- Substituting for another student or permitting any other person to substitute for you in writing an assignment, examination or mini-thesis.

Below we try to give further clarity.

**Poor Referencing Practices**

In contrast to plagiarism and academic dishonesty, poor referencing is not deceptive; it is simply sloppy. “Poor referencing” means that the way that you have presented the reference is not correct, e.g. a date is missing, the referencing is not consistent, but there is some attempt to show that this is not your idea or work.

Poor Referencing Practices include:

- Inaccurate punctuation in references;
- Mismatching text references and a Reference List;
- Spelling mistakes of names, titles, publishers, etc.;
- Incomplete references.
- Showing quotation marks without an accompanying citation.

On the next page are some examples of poor referencing practices and the consequences for students.
Penalties for Poor Referencing, Plagiarism or Academic Dishonesty

<table>
<thead>
<tr>
<th>Students in</th>
<th>Offence</th>
<th>Penalty</th>
</tr>
</thead>
</table>
| Any year of study including 1st year | Academic dishonesty/cheating | The case will be referred to the UWC Proctor (Disciplinary Officer) and the student will be prosecuted at any time in their university career. The potential consequences are as follows:  
- A hearing may result, at the Proctor’s discretion.  
- If found guilty, you may be suspended from study at UWC for a semester or longer.  
- You may forfeit marks for the assignment or be required to rewrite it.  
- You may forfeit marks for that module, resulting in your having to re-register for that module in the following year.  
- You may have to write a letter of apology to the lecturer/s concerned.  
- Your academic record may be endorsed, i.e. academic dishonesty will be noted on your transcript.  
- Your name would be published in the UWC campus newspaper.  
- This could affect your future references, and applications for bursaries. |

| 1st year of study with SOPH  
Semester 1 | Poor referencing or plagiarism | Lecturer returns the assignment to you for correction; marks are withheld until it is returned corrected. Marks are deducted according to assessment criteria. |
| 1st year of study with SOPH  
Semester 2 | Poor referencing | Lecturer returns the assignment to you for correction; marks are withheld until it is returned corrected. Marks are deducted according to assessment criteria. |
| 1st year of study with SOPH  
Semester 2 | Plagiarism | Lecturer returns the assignment to you for correction; marks are withheld until it is returned corrected. Marks are deducted according to assessment criteria. |
| 2nd or 3rd year of study | Poor referencing | Lecturer returns the assignment to you for correction; marks are withheld until it is returned corrected. Marks are deducted according to assessment criteria. |
| 2nd or 3rd year of study | Plagiarism | The lecturer is at liberty to return the assignment with a 0 result; the student repeats module. |
**Avoiding referencing penalties:**

In accordance with the University Policy on plagiarism, the School of Public Health has instituted various measures to help you, as a scholar in training by developing a mandatory tutorial on "Avoiding Plagiarism" which will be available on iKamva. This is to help you acquire proper referencing competencies.

To avoid penalties, wasting lecturer time and fees - through, for example, having to repeat a whole year - please familiarise yourself with proper referencing practice. There is a comprehensive guidance in the *Academic Handbook* Section 5.3. It is very important for the success of your studies that you master these rules and apply them without fail in your writing. Should you encounter a referencing situation that is not explained in the *Academic Handbook*, your lecturer will be happy to give you guidance, but please make sure you ask before you hand in your assignment.

**Signing the “Declaration by student”:**

The Assignment Cover Sheet that you are required to send with your assignment, contains a declaration which we required you to have signed: this declaration makes the promise that your assignment is your own work, and that you have used the required referencing system; when you sign this declaration, you are claiming the above to be the truth, and thus accepting all the penalties outlined above.

**Note:** We will return to you any assignment submitted without your signature in the “Declaration by student” slot.

### 8.4 ASSIGNMENT COVER SHEET

You will find amongst your module resources an Assignment Cover Sheet, which you are expected to use as the first page of all your assignments, including drafts. An electronic copy can be found on iKamva.

Do not send it as a separate file, but as the first page of your assignment. Sending it as a separate file defeats the purpose of labelling your assignment, and it wastes Administrator time to do this for you. Assignments without a Cover Sheet will be returned to you.
9  POSTGRADUATE DIPLOMA IN PUBLIC HEALTH

In this section, you will find information about the academic programme for the Postgraduate Diploma in Public Health in 2020, and about your modules.

Quick Reference for contact

- The Co-ordinator of the PG Diploma is Dr Anam Nyembezi (anyembezi@uwc.ac.za; +27 21 959 9573).
- Ms Janine Kader will be your first port of call for Student Administrative support, and any queries you may have regarding your studies.

The PG Diploma comprises six compulsory Core modules, and there are no Electives. The six Core modules of the PG Diploma level are designed to give you an overview of Public Health with an emphasis on district level (or equivalent in your country) service provision, and transformation of the health and welfare services, as well as strengthen your grounding in academic practice. These are the modules you will take:

- **Introduction to Public Health: its Basis and Scope;**
- **Descriptive Epidemiology;**
- **Population, Health and Development: Primary Health Care Approach I;**
- **Health Promotion for Public Health I;**
- **Management Strategies for Public Health Services I;**
- **Monitoring and Evaluation for Health Services Improvement I.**
If you wish to continue to a Master of Public Health after your PG Diploma, you would need to apply for that qualification and compete with other applicants; there is very high demand for the MPH, you would therefore need to have performed exceptionally well in the PGD in order to be considered.
ADMISSION

Unless Senate decides otherwise, candidates will be required to meet the following to be enrolled for the programme: Postgraduate Diploma in Public Health

Candidates must be in possession of a three year Bachelor’s degree or equivalent in any relevant discipline e.g. health sciences, social work, and education.

A minimum of three years working experience in the health or welfare sector is required.

A candidate may be admitted with an equivalent qualification, prior learning and experience, in accordance with Rule A.2.1.4 and approval of Senate.

Additional supporting documents may be required by the University from time to time.

SELECTION

As only a limited number of students can be admitted to the programme, applicants will be subject to a selection procedure.

DURATION

Unless Senate decides otherwise the duration of the programme shall extend over two years.

CURRICULUM

<td>120</td>
</tr>
</tbody>
</table>

ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

PROGRESS

Unless Senate decides otherwise, a full-time student shall complete the programme in one year. A student who passed at least 40 credits may proceed with his/her studies to complete the programme the following year.

RENEWAL OF REGISTRATION

The renewal of registration will be governed by the Rule A.4, as stipulated in the University Calendar: General Information Part 1.

SPECIAL REQUIREMENTS FOR THE PROGRAMME

There are no special requirements for this programme.
## 9.2 YOUR STUDY PROGRAMME

The Postgraduate Diploma modules are offered in the following semesters:

<table>
<thead>
<tr>
<th>Semester 1</th>
<th>Semester 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Introducing Public Health: its Basis and Scope (SPH 730)*</td>
<td>• Health Promotion for Public Health I (SPH 733)** and *</td>
</tr>
<tr>
<td>• Population, Health and Development: Primary Health Care Approach I (SPH 732)*</td>
<td>• Management Strategies for the Public Health Services I (SPH 735)</td>
</tr>
<tr>
<td>• Descriptive Epidemiology (SPH 731)*</td>
<td>• Monitoring and Evaluation for Health Services Improvement I (SPH 734)**</td>
</tr>
</tbody>
</table>

*Short courses at Summer School

**Short courses at Winter School

Over the two years, you are required to develop a portfolio which integrates and presents your learning achievements across the programme.

### Deciding on Your Pace of Study

You are encouraged to take the Postgraduate Diploma over two years since you are working. Over-commitment can lead to your not realising your real potential and dropping out of a module. This is often the case in Semester 2 when work commitments tend to increase. Below you will see how you would structure your studies over one year. However, as a working health professional, you should be careful not to over-commit yourself.

**Option 1: Studying full time and completing the qualification in one year**

<table>
<thead>
<tr>
<th>Semester 1</th>
<th>Semester 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Introducing Public Health: its Basis and Scope (SPH 730)</td>
<td>• Health Promotion for Public Health I (SPH 733)</td>
</tr>
<tr>
<td>• Population, Health and Development: Primary Health Care Approach I (SPH 732)</td>
<td>• Management Strategies for the Public Health Services I (SPH 735)</td>
</tr>
<tr>
<td>• Descriptive Epidemiology (SPH 731)</td>
<td>• Monitoring and Evaluation for Health Services Improvement I (SPH 734)</td>
</tr>
</tbody>
</table>

**Option 2: Studying part time and completing the qualification over 2 years**

This is how you could structure your studies over the two years.

<table>
<thead>
<tr>
<th>Semester 1</th>
<th>Semester 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Year 1</td>
<td></td>
</tr>
<tr>
<td>• Introducing Public Health: its Basis and Scope (SPH 730)</td>
<td>• Health Promotion for Public Health I (SPH 733)</td>
</tr>
<tr>
<td>• Population, Health and Development: Primary Health Care Approach I (SPH 732)</td>
<td></td>
</tr>
</tbody>
</table>

54
9.3 ASSESSMENT OF THE PG DIPLOMA IN PUBLIC HEALTH

All modules must, according to UWC policy, have at least two assessment points, which must include a formative and summative assessment. Formative assessment aims to facilitate learning; summative assessment aims to facilitate learning and to assess your competence. Assessment takes place through assignments, and there are no exams. See section 8 for general information on Assessment.

Where Will You Find the Assignments?
You will find your assignments in the Module Introduction of each Module Guide.

Pass Marks and Promotion
To pass a module:
- You must attain a minimum of 50% for each assignment.
- You must therefore have an aggregate of 50% or more for the module.
- You are required to pass your first assignment with 50% to be able to proceed to your final assessment.
- If you do not achieve 50% in Assignment 1, you may repeat it once only: if you repeat it, you cannot be awarded more than 50%. If you do not pass it second time around, you cannot proceed to Assignment 2 and must repeat the module.
- You may not rewrite Assignment 2 as it is held to be the summative assessment of the course.
- If you do not pass both assignments, you will have to repeat the module the following year.
- Should you not achieve 50% for the summative assessment, you will fail the module, even if your Assignment 1 pulls your mark above 50%. You will need to repeat it the following year.

It is advisable to aim for good results in all of your modules. If you hope to move on to the Master of Public Health, as you will be competing with all the other new applicants, you will stand a better chance of acceptance if your overall aggregate for the six modules is over 65%.

Moderation and Re-assessment of Assignments
Students may query their results if they fail an assignment. In this instance, another SOPH staff member will first moderate the result. If the student is still not satisfied, the assignment will be reassessed by the external examiner at a prescribed fee to be met by the student. All summative assessments are moderated by external moderators therefore final marks can only be confirmed once moderation is completed.

Assignment Submission Dates
The Assignment Schedule will be sent to you by the Student Administrator. The November deadlines are absolute. No extensions will be given. All assignments must be marked and marks submitted during November.
Weighting of the Two Assignments

The first assignment is weighted at 40% of your total result; the second is weighted at 60% of your overall result.

<table>
<thead>
<tr>
<th>Modules</th>
<th>Assignment 1 Weighting</th>
<th>Assignment 2 Weighting</th>
<th>Minimum Mark*</th>
<th>Pass</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Introducing Public Health: Its Basis and Scope</td>

<td></td>
<td>20</td>
</tr>
<tr>
<td>Total</td>
<td></td>
<td></td>
<td>50%</td>
<td></td>
<td>120</td>
</tr>
</tbody>
</table>

* One rewrite may be awarded if you achieve less than 50% in Assignment 1; a maximum of 50% may then be awarded.

9.4 MODULE DESCRIPTIONS - PG DIPLOMA IN PUBLIC HEALTH

Below are descriptions of the six modules required for this qualification. Short courses are offered for most of the modules.

Introducing Public Health: Its Basis And Scope (SPH 730)

This module introduces frameworks for understanding and analysing Public Health. It provides an orientation to students coming from the clinical fields of nursing and other health and welfare-related fields to the conceptual and theoretical vocabulary, resources and evolution of Public Health, and to the health systems arena. It also provides a foundation on the biological basis of disease for those from a non-clinical background. Topics include:

- An overview of the field of Public Health.
- The biological basis of disease and the social determinants of disease.
- The changing patterns of disease.
- The evolution of public health practice.
- Comparative health systems.
- Applying a Public Health approach.

MODE OF DELIVERY: Distance learning and Summer School short course in Semester 1.

ASSESSMENT: Two assignments.

Population Health and Development: A Primary Health Care Approach I (SPH 732)

This module introduces the conceptual and operational underpinnings of the Primary Health Care approach, with a view to providing equitable health services in developing country contexts.

Topics include:

- The inter-relationship of health, development and Primary Health Care.
- The burden, distribution and pattern of ill-health in the world.
- The political, social and economic context of health and disease.
- The Primary Health Care approach.

MODE OF DELIVERY: Distance learning and Summer School short course in Semester 1.

ASSESSMENT: Two assignments.

**Descriptive Epidemiology (SPH 731)**

This module has been developed to provide a basis for quantifying, analysing and prioritising the health problems and needs of communities/health service users. It serves as an introduction to descriptive epidemiology.

Topics include:
- Definition, scope, uses and application of epidemiology.
- Historical overview of the development of epidemiology.
- Practical disease concepts foundational to epidemiology.
- Descriptive biostatistics.
- Epidemiological health information.
- Outbreak investigation.
- Screening.
- Disease and injury surveillance.
- Interpretation of data.
- Presentation of health information.
- Reporting epidemiological events.

**MODE OF DELIVERY:** Distance learning and Summer School short course in Semester 1.

**ASSESSMENT:** Two assignments.

**Management Strategies for Public Health I (SPH 735)**

This module provides an orientation to the operational competences required to manage Public Health services.

Topics include:
- The District Health System
- The concept of management
- Health systems management
- Managing people
- Managing conflict
- Leadership, motivation and building teams
- The Planning Cycle
- Project planning
- Information for planning and management
- Managing resources, e.g. essential drugs, personnel
- Developing and interpreting budgets

**MODE OF DELIVERY:** Distance learning in Semester 2.

**ASSESSMENT:** Two assignments.

**Health Promotion for Public Health I (SPH 733)**

This module provides an orientation to the conceptual and theoretical vocabulary, resources and evolution of Health Promotion in the context of population health. Topics include:
- Health Promotion concepts and principles
- The determinants of health.
- The development of Health Promotion.
- The significance of the Ottawa Charter.
- The Settings Approach to Health Promotion.
- Models of change in Health Promotion.
- Programme development and planning in Health Promotion.
- Communication strategies for Health Promotion.
- Evaluation strategies

**MODE OF DELIVERY:** Distance learning in Semester 2 and Winter and Summer School
short courses.
ASSESSMENT: Two assignments.

**Monitoring and Evaluation for Health Services Improvement I (SPH 734)**

This module introduces programme monitoring and evaluation strategies which are essential research skills for Public Health professionals in the health services. Topics include:

- The role of monitoring and evaluation in district health management.
- Monitoring and evaluation – strategies and tools.
- Key concepts and issues in monitoring and evaluation.
- Data analysis and interpretation.
- Case studies of monitoring and evaluation activities in health.

MODE OF DELIVERY: Distance learning in Semester 2 and short course at Winter School in Semester 2.
ASSESSMENT: Two assignments.

Remember that PGD graduates do not automatically qualify for the MPH. You need to apply for the MPH and compete with other candidates

---

10 **MASTER OF PUBLIC HEALTH (MPH)**

In this section, you will find the official Academic Rules for the Master of Public Health, the qualification structure, assessment schedule, the module descriptions, and a timetable showing when modules will be delivered. The Senior Academic Co-ordinator is Ms Nikki Schaay with Dr Verona Mathews as Co-ordinator of the MPH Coursework modules. The Student Administrators share responsibility for the modules. Dr Hanani Tabana co-ordinates the Mini-thesis.

The 2020 MPH requires you to complete eight 15 credit modules and a 60 credit Mini-thesis over 3 years with a possible 4th year. We strongly encourage working health professionals to consider carefully their pace of study. Taking three modules a semester will be extremely taxing, and equivalent to full-time study which can result in poor results, or dropping modules. Be aware that the mini-thesis seems to take students at least a year from completion of the Public Health Research module; the University rules state that you should complete the Programme in three years. Although discouraged, applications can be made for a 4th year through Senate Higher Degrees Committee. You should however recognise that you will need to free up time in your daily life in order to keep up with your studies. See also sections 5.3 and 10.3.
Assignment deadline dates will be sent to you by the Student Administrators. Where assignment deadlines clash, the Student Administrators will adjust them with you and your lecturers. There are brief descriptions of the modules in section 10.5 and 10.6.

10.1 ACADEMIC RULES FOR THE MASTER OF PUBLIC HEALTH, MODE 1

(Note that the information below is a guide only - please consult the official UWC and CHS Faculty Rule Book)

The MPH consists of:
- six 15 credit Core (compulsory modules),
- two 15 credit Electives
- and a 60 credit Mini-thesis.

Take note of the Core modules you must take (and their nicknames):
- Population Health and Development: A Primary Health Care Approach II (PHD II)
- Measuring Health and Disease - Intermediate Epidemiology (MHD II)
- Management Strategies for the Public Health Services II (MS II)
- Health Promotion for Public Health II (HP II)
- Public Health Research (PHR)
- Qualitative Research Methods (QRM)
  or
- Quantitative Research Methods (QnRM)

Refer to Section 10.2 for how to structure your programme per year. You are obliged to take all the Core modules. Those who choose the faster track will take their first Elective in the 2nd semester of year 1.

Below are the official UWC Academic Rules for the MPH under which you would be registering:

ADMISSION

Unless Senate decides otherwise, candidates will be required to meet the following criteria to be enrolled for the programme: Master of Public Health (MPH)

Candidates must be in possession of an Honours degree, Postgraduate Diploma in Public Health or equivalent at Level 8 in any relevant discipline.

A minimum of three years working experience in the health or welfare sector is required.

Candidates who do not have credit for a tertiary level course in disease pathogenesis, disease measurement or disease control must take the module, Introducing Public Health: Its Basis and Scope from the PG Diploma in Public Health, and pass an assessment before or during their first semester.

With due regard to rule A.2.1.4, personnel in the health and welfare sector with a minimum of five years of relevant experience in implementing health and welfare policy or planning and managing health and welfare services, may be admitted to the course after assessment of prior learning and experience.

Additional supporting documents may be required by the University from time to time.

SELECTION

As only a limited number of students can be admitted to the programme, applicants will be subject to a selection procedure.

Preference will be given to candidates employed in the health and welfare sector with a minimum of three years of relevant experience.

DURATION

Unless Senate decides otherwise the duration of the programme shall extend over a maximum of three years full-time or part-time. Students must apply to the Senate in order to enroll for a fourth year.

Capita Selecta B  SPH854  15

Subtotal  30

Mini-thesis of 7 500 – 20 000 words  SPH803  60

TOTAL  180

ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

PROGRESS RULES

Students must complete 45 credits by the end of Year 1 (3 Modules).

Students must complete 75 credits by the end of Year 2 (5 Modules).

Registration for the following year of study will be recommended by the supervisor if in his/her opinion adequate progress has been made with the mini-thesis during the current year.

A student must have successfully completed all prescribed modules and obtained a total of 180 credits to complete the degree.

Where the rules governing a curriculum are amended, and Senate does not decide otherwise, a student who registered under the old rules and who has attended the University without interruption, may, unless the amended rules otherwise provide, elect to proceed with his/her studies either in terms of the old rules or in terms of the new rules, provided that:

a) (s)he may not elect to proceed partially in terms of the old and partially in terms of the new rules;
b) (s)he shall be bound by his/her choice; and
c) her/his right to proceed in terms of the old rules, should (s)he so have elected, shall lapse should (s) he fail
to gain sufficient credits to proceed to the following level of study. (Ref A.1.1.3).

RENEWAL OF REGISTRATION
The renewal of registration will be governed by the Rule A.4, as stipulated in the University Calendar: General Information Part 1.

SPECIAL REQUIREMENTS FOR THE PROGRAMME
There are no special requirements for this programme.

10.2 ACADEMIC RULES FOR THE MASTER OF PUBLIC HEALTH, MODE 2
(Note that the information below is a guide only - please consult official UWC and CHS Faculty Rule Book)

ADMISSION
Unless Senate decides otherwise, candidates will be required to meet the following criteria to be enrolled for the programme:

**Master of Public Health (MPH)**

- An Honours degree, Postgraduate Diploma in Public Health or equivalent at Level 8 in any relevant discipline OR completion within the preceding 5 years of Master’s level coursework covering the competencies of the core modules of the UWC MPH degree.
- A minimum of five years in the health or welfare sector with relevant experience in implementing policy or planning and managing health or welfare services, including a minimum of three years of significant research or monitoring and evaluation experience.
- A tertiary level course in disease pathogenesis, disease measurement or disease control, if the candidates do not have the credit then they have to take the module *Introducing Public Health: its Basis and Scope* from the PG Diploma in Public Health, and pass an assessment before or during their first semester
- Supporting documents as evidence of eligibility.

SELECTION
As only a limited number of students can be admitted to the programme, applicants will be subject to a selection procedure.

Preference will be given to candidates employed in the health and welfare sector with a minimum of five years in the health or welfare sector with relevant experience in implementing policy or planning and managing health or welfare services, including a minimum of three years of significant research or monitoring and evaluation experience.

DURATION
Unless Senate decides otherwise, the duration of the programme shall extend over a minimum of two years and a maximum of three years. Students must apply to the Senate in order to enroll for a fourth year.

CURRICULUM
Students must select a topic and design and complete a research project that is situated within the scope of topics and approaches covered in the Areas of Specialization (listed in Table 1) offered at the school. Students may choose to enroll for these modules for non-degree purposes in order to strengthen their own personal development. With permission from SOPH, students may apply the content and approach of other disciplines to their thesis project, provided these are deemed of direct relevance to Public Health.

Table 1: Areas of Specialization within the School of Public Health

1. Population Health and Development: A Primary Health Care Approach II
2. Measuring Health and Disease - Intermediate Epidemiology
3. Management Strategies for the Public Health Services II
4. Managing and Supporting Health Workers
5. Health Promotion for Public Health II
6. Qualitative Research Methods
7. Quantitative Research Methods
8. Public Health Research

Health Promotion
9. Health Promoting Schools
10. Alcohol Problems: A Health Promotion Approach
11. Health Promoting Settings

Health Research
12. Monitoring and Evaluation in Health and Development Programmes

Health Information Systems
13. Using Information For Effective Management I

Human Resources Development
14. Introduction to Health Workforce Development
15. Evidence-based Human Resource Planning

Nutrition
17. Epidemiology of Non-Communicable Diseases

Pharmaceutical Public Health
18. Rational Medicines Use
19. Medicines Supply Management

Other
20. Globalisation and Health
21. Understanding and Analysing Health Policy

ASSESSMENT

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

PROGRESS RULES

Students must have submitted an approved research proposal to Senate Higher Degrees by the end of Year 1.

Students must complete data collection by the end of Year 2.

Registration for the following year of study will be recommended by the supervisor if in his/her opinion adequate progress has been made with the thesis during the current year.

A student must have successfully completed a Masters research thesis and obtained a total of 180 credits to complete the degree.

RENEWAL OF REGISTRATION

The renewal of registration will be governed by the Rule A.4, as stipulated in the University Calendar: General Information Part 1.

SPECIAL REQUIREMENTS FOR THE PROGRAMME

There are no special requirements for this programme.

10.3 DECIDING ON YOUR PACE OF STUDY

Options for your pace of study are limited: if your workload is relatively light, you could take Option 1 - three modules per semester (and six in Year 1), or if your work is pressured, take Option 2 two modules per semester and four in Year 1. (Semesters are approximately 19 weeks long).

The qualification is expected to be completed within three years. See Progress Rules within the Academic Rules for the Master of Public Health (10.1) above. Should you have to extend your studies to a 4th year, you will need to request permission, provide motivation for why you need the additional time with measures and timelines, pay the mini-thesis fee again and a penalty fee.

Recognising the Time Requirements for a Mini-thesis

*Public Health Research* is the foundation module for your mini-thesis. It is followed by *Quantitative or Qualitative Research Methods*, through which you will start developing your research proposal (protocol). It is wise to start thinking of your area of interest immediately. After completing the modules, you will have sections of your protocol, which you will then start refining with a supervisor.

When deemed ready, your research proposal must be submitted to the Community and Health Sciences Higher Degrees Committee (CHSHD) and the UWC Senate Research Committee. These committees meet monthly except for July, November, December and January. Refining your protocol will probably take several months.

After your protocol is accepted by the CHSHD, it takes time to complete a Mini-thesis; plan some dedicated time for it, i.e. try to take a week off to complete the protocol, and a month or two of leave to complete the Mini-thesis. You could also arrange to travel to Cape Town for a week or two to work with your supervisor (by prior arrangement).

You are expected to complete your whole MPH within a maximum of three years. Taking longer than three years is not encouraged, as it may undermine your motivation and you will incur penalties for every year you take beyond the third year; however, it is however possible, with permission from Senate, and subject to certain conditions you must meet.

Be aware too that Higher Education institutions are financed by government on the basis of throughput: if throughput is low or students take longer than the stipulated time to complete, the institutional leadership exerts pressure on the SOPH to exclude students from further registration.

**10.4 SELECTING YOUR ELECTIVES**

Those taking Option 1 with more pressure at the outset, must take their first Elective in 2020. You can, however, take a module from another UWC department provided you can attend lecturers, and it is deemed relevant to Public Health, or one from UCT (University of Cape Town’s) Postgraduate Programme.

**The Range and Mode of Electives**

Your Electives are selected from a range of modules offered in the following ways:

- Distance learning (DL)
- Short Courses offered at Winter School (SC). MPH students can take an MPH Elective which is delivered only as Short Courses (SC) only at Winter School; if you select one of these, you must attend Winter School, complete all required reading and activities and then complete two assignments.
- With permission from SOPH*, students may take two Masters level electives (up to 30 credits) from another Department at UWC, provided these are deemed of direct relevance to Public Health. Their availability must be checked with the relevant department. [*To do so, write to the Student Administrator, Ms Corinne Carolissen, ccarolissen@uwc.ac.za]. An elective from another UWC department or UCT must be the equivalent of 15 credits.
- Students resident in Cape Town may take modules from the School of Public Health and Family Medicine at the University of Cape Town (UCT). You need to attend their weekly classes. Contact Ms Tshamani Netshifhefhe, UCT Health Sciences Faculty, Anzio Road, Observatory. Tel +27 +21 650 1098. E-mail Tshamani.Netshifhefhe@uct.ac.za. She will e-mail you their brochure.
Electives and Areas of Specialisation

Our Electives have been developed to provide a measure of specialisation in your MPH. You have the option to choose Electives from one of seven areas of specialisation. These areas of specialisation represent some of the key areas of Public Health research and practice for specific career paths, e.g. if you are working in Health Promotion, you would choose your Electives from that area of specialisation and write your Mini-thesis on a related topic.

The areas of specialisation are:
1. Health Promotion
2. Health Research
3. Health Information Systems
4. Nutrition
5. Pharmaceutical Public Health

You are under no obligation to choose Electives from one particular area of specialisation, and you will note that some Electives, e.g. Globalisation do not fall into an area of specialization. See section 10.1, Academic Rules, for how modules fall into areas of specialisation. Please note that some modules may call for a pre-requisite (Pre-R) or foundation module to be taken. Read the Module Descriptions in section 10.6 and 10.7 to check for pre-requisites. The list that follows sets out your Elective options for 2020.

### 10.5 ASSESSMENT OF THE MASTER OF PUBLIC HEALTH

All modules must, according to UWC policy, have at least two assessment points, which must include formative and summative assessment. In most modules, the formative assessment which aims to facilitate learning will count 40% towards your final mark in the module; the summative assessment which aims to facilitate learning and assess your competence and is weighted at 60%. Assessment takes place through assignments and there are no exams. See section 8 for more information on assessment.

**Pass Marks**

Please note that you are required to pass your first assignment with at least 50%, to proceed to your second and final assessment. To pass a module, you must attain a minimum of 50% for each assignment and therefore an aggregate of 50% or more per module. If you do not achieve 50% in Assignment 1, you may repeat it once only, but can only be awarded 50% for the rewrite assignment; if you do not pass Assignment 2, you will have to repeat the module the following year. Should you obtain a mark of less than 50% for the summative assessment, while your overall mark is 50% and above, it still means that you have failed the module and will need to repeat it the following year. All summative assessments are moderated by external moderators therefore final marks can only be confirmed once moderation is completed.

**Weighting of the Two Assignments**

In most modules, the first assignment is weighted at 40% of your total result; the second is weighted at 60% of your overall result.

**Assignment Submission Dates**

The Assignment Submission Schedule will be sent to you by the Student Administrator. The October deadlines are absolute. No extensions will be given. Administrators submit marks during November.

**Where are Your Assignments?**

You will find your assignments in the Module Introduction (first section) of each Module Guide.

### 10.6 MASTER IN PUBLIC HEALTH: CORE MODULE DESCRIPTIONS

**Note:** Only the modules offered in 2020 are described here

**Population Health and Development: A Primary Health Care Approach II (SPH855)**

This module focuses on the determinants of health in Africa and the burden and pattern of disease across the continent. Issues related to
causation, health inequity and the relationship between health and development are discussed in terms of population health and planning Public Health interventions.

The module introduces the Comprehensive Primary Health Care approach which has been designed to address the implications of the underlying determinants of health. In addition, the module explores key issues to be considered in relation to health policy, finances and human resources when establishing a Comprehensive PHC (CPHC) approach to health and health care at district level.

**MODE OF DELIVERY:** Distance learning plus Short Course at Summer School. The module is supported through Additional Resources and an online Discussion Group.

**ASSESSMENT:** Two assignments.

---

**Measuring Health & Disease II (SPH856)**

This module aims to enhance the measurement skills essential for effective Public Health practice. It examines several key concepts, methods and the role of Epidemiology in Public Health. It provides a variety of tools for the assessment and interpretation of health problems. It is intended to enable professionals working in the health sector to bring a critical and analytical insight into Public Health decision-making.

The module consists of six units divided into 4-7 study sessions, one for each topic. The course explores the nature of epidemiological health information, the natural history of disease, *Epi Info*, causation, study design, infectious diseases, outbreaks, screening and surveillance, the interpretation of data, representation of health information and reporting on an epidemiological event.

**MODE OF DELIVERY:** Distance learning, online learning and a Summer School Short Course in Semester 1. This is a complex module if you do not have prior experience in biostatistics or the use of an analytical computer package such as *Epi Info*. Students are strongly advised to take the Short Course, and can elect to stay for the workshop (to be offered on a Saturday during Summer School which provides additional training in *Epi Info*).

**ASSESSMENT:** Two assignments including an epidemiological report based on a raw data set provided by your lecturers. You will be required to use the computer Programme, *Epi Info*, to analyse and interpret this data set.

---

**Health Promotion for Public Health II (SPH859)**

This module aims to provide the learner with a theoretical understanding of Health Promotion as well as some practical skills in planning and implementing effective and appropriate Health Promotion Programmes and activities.

The sessions focus on interrogating the main theories of Health Promotion and their application in an underdeveloped country context, outlining the approaches commonly taken in successful Health Promotion Programmes from international examples, and providing the learner with some tools for
planning, managing and evaluating district or regional multi-sectoral Programmes. A district-based Programme development case study is used as a teaching tool within the module.

**MODE OF DELIVERY:** Distance learning and the Summer School short course in Semester 1. The course is offered through a Module Guide, Readings and Additional Resources.

**ASSESSMENT:** Two assignments.

---

**Management Strategies for the Public Health Services II (SPH857)**

This module was developed in recognition of the fact that health professionals often hold significant management responsibilities, often without even being called a manager. The module locates management as a key role in relation to health systems strengthening and places emphasis on reflecting on your own management practices and how to improve these.

Important themes in this module are managing by leading, and organisational change as the ongoing context in which managers are required to lead. The teaching focus aims to help you understand your own role as a leader and manager in the context of the public health system, to strengthen your capacity to analyse everyday management and service delivery problems, and to offer guided opportunities to plan improvements which address such problems. Aspects of managing relationships with people are included as well as an appreciation of systems requirements for managing information, finances and other resources to achieve better health.

**MODE OF DELIVERY:** Distance learning, online learning and the Short Winter School Course in Semester 2.

**ASSESSMENT:** Two assignments.

---

**Public Health Research (SPH862)**

This module serves to introduce the foundations of Public Health research, guiding you through selected approaches to research, and the foundations of designing a research study. This includes developing a critical literature review, sampling and ethical considerations.

This should place you in a position to select an appropriate approach for your mini-thesis study, enabling you to proceed to a specialized module in your selected approach (Qualitative or Quantitative), through which your protocol will be developed.

**MODE OF DELIVERY:** Distance learning and a Short Winter School Course in Semester 2.

**ASSESSMENT:** Two assignments.
Quantitative Research Methods (SPH861)

This module expands your knowledge on the types and design of quantitative research studies including data collection and data management using basic statistics, and measures of association, statistical testing, and sample size and power. The student will get an understanding of the ethical concepts in research with human subjects. The student will be given the opportunity to apply the concepts of validity, reliability and precision for quantitative study design. The student will also be given the opportunity to apply their knowledge in writing a research proposal or report.

At the end of this module students should be able to:

- Demonstrate understanding of the ethical principles for conducting research with human subjects.
- Distinguish between the designs of the most common types of quantitative research studies.
- Define and identify association, causation, bias and confounding within the context of quantitative research.
- Apply concepts of validity, reliability and precision within the context of quantitative research.
- Apply basic data collection, data management, data handling and project management for quantitative research.
- Analyse and interpret health data using basic biostatistics and statistical computing techniques.
- Define and apply the basic elements of a research proposal and research report.

MODE OF DELIVERY: Summer School short course in Semester 1 as well as distance learning.

ASSESSMENT: Two assignments.

Qualitative Research Methods (SPH860)

This module aims to develop an understanding of the philosophical and methodological foundations of qualitative approaches to research; more importantly, it aims to develop the capacity to practise and apply its methods to a selected research problem. By the end of the module, students should have sufficient competency and understanding of the approach to develop a qualitative research protocol and after approval, to implement a study addressing a Public Health problem of their choice.

PREREQUISITE: Students are required to take this module after completing the Public Health Research module.

By the end of this module students should be able to:

- Present a rationale for choosing a qualitative research for a research problem in terms of the theoretical (philosophical) underpinnings of qualitative research.
- Demonstrate awareness of the kinds of problems or questions best addressed by qualitative methods.
- Engage in flexible (qualitative) research design showing an understanding of
the stages of design, characteristics, purpose and application of qualitative research techniques. This will include the following outcomes:

- Describe a research problem and its Public Health context;
- Develop a study aim and objectives;
- Identify the information and the data sources which will be required to address this problem.
- Develop tools for collecting data from these sources.
- Select and provide a rationale for data collection techniques.
- Practice three data collection techniques.

- Propose a data collection sample and provide a rationale for it.
- Propose the intended process of analysis, provide a rationale for these choices and practice the technique.
- Describe the purpose and process of different approaches to qualitative research.
- Present a logically argued plan for ensuring rigour of the study.
- Describe and use ethical procedures in qualitative research.
- Analyse and discuss examples of selected qualitative approaches and critique their design and rigour.
- Present a logically argued plan for ensuring rigour in your study.

MODE OF DELIVERY: Short course at Summer school in Semester 1 and distance learning.

ASSESSMENT: Two assignments.

10.7 MASTER OF PUBLIC HEALTH: ELECTIVE MODULE DESCRIPTIONS

Epidemiology and Control of Chronic (Non-Communicable) Diseases (NCDs) (SPH867)

This course aims to develop an integrated, Public Health approach to understanding and addressing chronic diseases, and to create a shift in approach from disease specific/biomedical models to integrated approaches. The course makes use of key concepts and principles of epidemiology to develop a comprehensive view of the conditions dealt with, with an emphasis on developing and refining the practical skills required for decision making and programme development.

By the end of this module, students should be able to:

- Analyse risk factors for chronic non-communicable diseases (CNCDs) both locally and internationally.
- Critically analyse barriers to the implementation of global strategies for the prevention and control of CNCDs in order to develop local preventive strategies.
- Analyse the resources and skills required at local level in order to implement appropriate interventions.
- Create locally appropriate strategies to address the risk factors using the principles of Health Promotion.
- Create an evaluation plan in order to assess the effectiveness of an intervention.

Diseases or conditions to be covered may include obesity, cancer, diabetes, heart disease and hypertension.

MODE OF DELIVERY: Distance learning in semester 2. ASSESSMENT: Two assignments.
**Introduction to Health Workforce Development (SPH871)**

This course provides an introduction to the scope and main functions of human resources development (HRD). It covers all major areas of HRD (planning, preparing and managing the health workforce), and places them in the context of health systems development and health sector transformation. It also introduces students to the most important debates in the field today.

By the end of this module, students should be able to:

- Analyse the key components and roles of health workforce development in the health sector within local and international contexts.
- Critically engage with the rationale, benefits and pitfalls of major human resources development strategies.
- Conduct a human resource study of an organization using relevant evidence.
- Develop appropriate, evidence-based human resources strategies.
- Evaluate and apply principles and tools of monitoring and evaluation of human resources for health (HRH).

**MODE OF DELIVERY:** Distance learning in Semester 1. **ASSESSMENT:** Two assignments.

---

**Globalisation and Health (SPH868)**

This course covering a critical Public Health topic, illustrates the impact of globalization on population health. Although, globalization comes with benefits such as access to information, collaborative research and mobilization, other manifestations of it in the Public Health context include immigration, travel and flow of infectious diseases, increasing income inequality and their impact on social determinants of health. This module makes use of key concepts to provide the crucial understanding of the opportunities that globalization potentially holds for improving the health of all as well as the threats it presents to global health.

This course is interesting and critical for Public Health students because:

- It encourages students to think about the benefits of globalization as well as its negative effects on Public Health in different parts of the world.
- It explores the complex relationships between health and health care and the social, cultural, economic and political causes of disparities in health and health care between and within countries, with a focus on how global factors contribute to these.
- It guides students in making critical judgments on who benefits the most from globalization and how the costs of globalization can be shared in a fairer way.
- It also raises interesting questions around the relationship between globalization and climate change.
- It shows how globalization affects health policies, health systems, which in turn affect health care services for individuals.

The module uses multimedia elements and a case-based approach to consolidate the learning. Students will be presented by detailed case studies from around the world, one on the Treatment Action Campaign and another on child obesity. Students are encouraged to discuss interventions and policies and their importance in addressing social determinants of health and in the consequences of globalization.

**MODE OF DELIVERY:** Distance learning and a Short Winter School Course in semester 2. **ASSESSMENT:** Two assignments

---

**Public Health Nutritional Policy and Planning (SPH870)**

This course provides a general overview of the nutrition situation in the world as well as a historical overview of nutrition programmes. It explores some of the technical factors which contribute to successful nutrition programmes and introduces a range of
competencies required to implement successful programmes.

By the end of this module students should be able to:

- Give an overview of the nutrition situation in the world including factors affecting nutrition as well as the impact of nutrition on health, disease and development
- Critically assess the appropriateness of nutrition and related interventions or programmes to address a given nutrition situation.
- Identify key factors contributing to success or failure of interventions or programmes to address nutrition problems.
- Describe socio-political factors related to the success of interventions or programmes to address nutrition problems.
- Outline approaches to and impact of community participation in interventions or programmes to address nutrition problems.
- Design an appropriate nutrition communication strategy for interventions or programmes to address nutrition problems.
- Plan and implement appropriate interventions or programmes to address nutrition problems.
- Monitor and evaluate interventions or programmes to address nutrition problems.

MODE OF DELIVERY: Distance learning in semesters 2. ASSESSMENT: Two assignments.
Please note that Nutrition modules cost a little more than the rest of SOPH’s modules: see Section 6.3.

Understanding and Analysing Health Policy (SPH851)

This course will enable students to better understand, analyse and formulate health policy which is an important component of health manager capacity. It will cover key issues in policy analysis, theoretical frameworks and approaches used in health policy analysis and key health policy debates.

By the end of the course participants will be able to:

- Demonstrate understanding of the varied and iterative nature of policy change processes to assess and review a programme.
- Include, and demonstrate the role of, implementation in a policy change process.
- Identify key components and factors facilitating and constraining policy and implementation processes.
- Conduct comprehensive analyses of policy and implementation processes.
- Apply theoretical frameworks and approaches in understanding policy and implementation processes and apply specific policy analysis tools.
- Use policy analysis for strategic planning.

MODE OF DELIVERY: Distance learning and short Winter School course in Semester 2. ASSESSMENT: Two assignments.

Health Information Systems (SPH878)

It is advisable to take Measuring Health and Disease II prior to this module.

The course is on using different sources of information as evidence for monitoring, planning, management and decision making in the public health service. The course draws on evidence based management approach to capacitate managers at different levels in the public health system to calculate and interpret information for decision-making and report writing. The principles of routine information system with systematic data quality checks are used to evaluate the organisational information systems in terms of its effectiveness in providing the evidence for evidence based management.

At the end of this module students should be able to:
• Critically analyse the use of information in evidence-based management public health services
• Assess the different sources used in evidence-based management in public health services
• Evaluate the components and sub-systems of a health information system
• Apply data quality checks to different health information data sets
• Interpret information for evidence-based planning and management pertaining to management of health services.
• Monitor and evaluate district health information systems.

MODE OF DELIVERY: Distance learning in Semester 1.
ASSESSMENT: Two assignments.

Pharmaceutical Policy and Management (SPH875)

This new module, Pharmaceutical Policy and Management introduces students to pharmaceutical policy and management issues within the health systems framework and will be an additional elective in the MPH within the Pharmaceutical Public Health group, which provides students with an interest in this area a degree of specialisation.

By the end of the this module students should be able to:
• Identify the key role that pharmaceuticals play in health systems
• Critically explore and analyse how access to and rational use of pharmaceuticals play a key function in health systems
• Identify how the health and pharmaceutical policy process are linked together at different levels of the health system
• Demonstrate how policies can be developed and incorporated into management systems to improve access and use of medicines
• Analyse existing policy instruments that have been used to manage the delivery of pharmaceutical systems
• Prepare a policy brief and critically review an existing policy document
• Develop an implementation plan for a new policy that would include monitoring and evaluation indicators.
• Identify the importance of community involvement in policy development, health promotion and in the design and implementation of interventions.
• Evaluate the particular pharmaceutical policy needs for medicines with particular characteristics such as vaccines or controlled substances
• Analyse points in the pharmaceutical supply and use chain that are particularly vulnerable to corruption and suggest policy and managerial approaches to address these vulnerabilities.

MODE OF DELIVERY: Winter School Short Course and Online learning in Semester 2.
ASSESSMENT: Two assignments.

Rational Medicines Use (SPH873)

This module will engage students from various professional and national backgrounds in the importance of the rational medicines use concept. It will introduce a range of well tested and practical tools to investigate medicines use problems and key strategies to promote rational medicine use.

By the end of the course participants will be able to:
• Advocate for rational medicine use and its importance within health systems;
• Identify and analyse the application of quantitative methods to identify medicine use problems;
• Evaluate qualitative methods and their application to investigate medicine use and prescribing behaviour;
• Identify and analyse the importance of determining efficacy, safety, effectiveness and cost effectiveness of medicines in decision making;
• Evaluate the importance of clinical evidence in decision making and formulary
anagement;
• Critically evaluate the principles of the anti-microbial resistance concept and the role of rational medicine use in its prevention;
• Critically review the role of Pharmaceutical and Therapeutics Committees (PTCs) in all of the above.

MODE OF DELIVERY: Winter School Short Course and Online learning in Semester 2.
ASSESSMENT: Two assignments.

Monitoring and Evaluation in Health and Development Programmes (SPH866)

PRE-REQUISITE MODULE: Take Measuring Health and Disease II prior to, or concurrent with this module.

This module provides the opportunity to develop an understanding of key evaluation concepts and issues and to expand your knowledge of evaluation approaches and methods. In particular, it will focus on the key complexities inherent in the monitoring and evaluation of programmes based on Primary Health Care and Health Promotion principles. Students will be involved in critically appraising evaluations and will design a monitoring or evaluation Programme relevant to their area of interest.

MODE OF DELIVERY: Distance learning in semester 2 and a Short Course at Winter School.
ASSESSMENT: Two assignments.

Micronutrient Malnutrition (SPH864)

This module includes an overview of vitamins and minerals relevant to Public Health in South Africa. There is in-depth discussion of interventions to address micronutrient malnutrition and an overview of Programme planning and monitoring and evaluation of interventions.

By the end of the module, you are expected to demonstrate understanding of:
• The classification, characteristics, functions, digestion, absorption, metabolism, dietary sources and dietary allowances for the micronutrients;
• The sensitivity of diagnostic measures;
• Interventions appropriate to address micronutrient malnutrition;
• The planning process;
• Monitoring and evaluation of interventions to address micronutrient malnutrition.

You are expected to demonstrate skills in:
• Planning appropriate interventions to address specific micronutrient deficiencies.

MODE OF DELIVERY: Distance learning in Semesters 1 and 2.
ASSESSMENT: Two assignments.
Although you will only embark on your mini-thesis in your second year, it is important that you understand the process that lies ahead. The mini-thesis is the final requirement for the Master of Public Health. It should be 7 500 – 20 000 words long, depending on whether it is a Qualitative or Quantitative study. In our experience, however, less than 8 000 words does not provide adequate scope for a mini-thesis. It is weighted at 60 credits, and together with the Public Health Research module and the Quantitative Research Methods or Qualitative Research Methods or Monitoring and Evaluation in Health and Development Programmes module, this research component makes up 50% of your qualification.

After completing two assignments for Public Health Research, you take either Qualitative Research Methods or Quantitative Research Methods module in your second year. These modules guide you through the respective approaches and the process of developing a research protocol. You are expected to spend a few months working with a supervisor before submitting your protocol to the Community and Health Sciences Higher Degrees Committee (CHSHD). They meet monthly, except for November, December and January. You may also need to submit your protocol to an Ethics Committee in your own country. Spend time in advance finding out about this, so that it does not delay you.

Be aware that from the start of your mini-thesis, you need to remain very focused; because you will not have regular assignments to hand in by certain deadlines, you will need to create your own work plan, otherwise your timing could become drawn out. Linking up with fellow students to motivate each other is also a good idea. Asking someone who is versed in the topic in your workplace to meet regularly with you, simply so you have someone to discuss it with, is also a good idea.

**What is a research protocol?**
The protocol or proposal is a short, [max 12 page] but comprehensive outline of your mini-thesis. In the protocol, you describe in some detail what you are going to do to carry out your research. You present a literature review of what has been understood about the topic to date, and explaining what contribution YOUR research will make. The protocol stage is intended as a checkpoint to ensure that the research study you are planning is do-able and ethical, amongst other considerations. You will receive a framework that you must follow, as well as some exemplars of past protocols.

**Mini-Thesis Week**
During your thesis year, you will be invited to attend a week-long mini-thesis workshop.

**Assessment:** Your mini-thesis will be marked by two examiners (one internal and one external) and the examiners’ reports will be submitted to the Community and Health Sciences Higher Degrees and Senate Higher Degrees Committees.

**Information and Support**
The Co-ordinator of mini-theses is Dr Hanani Tabana: work 021 959 9394. We strongly urge you to make, and keep, contact with the Division for Postgraduate Studies.

We provide Guidelines for the completion of your protocol and Mini-thesis in Year 2. This will be sent to you when you need it.

UWC Division for Postgraduate Studies aims to make thesis development not only easier, but also increase your chances of success. Find out more about what they offer by
exploring their website.

**Gearing up to Publish**
As an MPH student, you should be gearing up to publish your MPH research - which, as it has been collaboratively developed with your supervisor, would make your supervisor a co-author of your published work. In your article, you would list your affiliation with UWC, as well as the institution you are associated with in a work capacity. Should you decide to publish based on thesis-work, it is imperative that you follow the School’s Student Publication Guidelines. These may be sent to you on request. Consult with your supervisor or request the Guideline from the Student administrators.

**Choosing A Mini-Thesis Topic**
As you near the end of your first year, guidance will be given on choosing a research topic. You may be encouraged to work with one of SOPH’s more experienced researchers on a project with potential impact. This will benefit both you and the project leader, because it will feed into the project and result in your mini-thesis and a manuscript with potential for publication.

**11 PhD IN PUBLIC HEALTH**

The SOPH offers an academically oriented doctorate by thesis, which implies a very large research project written up in a full thesis. This work should contribute new and original knowledge to your chosen field. It usually takes between three and five years to complete your thesis, depending on the time you are able to commit to your research and writing. There is no course work or structured programme attached to the thesis. Our programme is small, because we have a limited number of staff who can supervise PhD students. We assess every request on merit, based on the person’s CV and research experience, and if his or her project matches our areas of expertise.

Our main areas of expertise are public health nutrition, maternal and child health, HIV/AIDS, health information systems, human resource development, health policy and systems research and pharmaceutical public health. Apart from having completed your Master qualification, you should also have additional research experience and a couple of research publications which you have authored or co-authored.

Our programme is small, because we have a limited number of staff who can supervise PhD students. We assess every request on merit, based on the person’s CV and research experience, and if his or her project matches our areas of expertise.

Please visit the following website for more information and complete an expression of interest form: [http://www.uwcsoph.co.za/index.php/academic-programmes/phd-in-public-health](http://www.uwcsoph.co.za/index.php/academic-programmes/phd-in-public-health).

**11.1 RULES FOR THE PhD IN PUBLIC HEALTH**
(Note that the information below is a guide only - please consult official UWC and CHS Faculty Rule Book)

**PHILOSOPHIAE DOCTOR (PhD)**

**DOCTOR OF PHILOSOPHY – 8950**

**ADMISSION**
Unless Senate decides otherwise, candidates will be required to meet the following criteria to be enrolled for the programme:

**Doctor of Philosophy (PhD)**

A student shall have obtained a Master's degree or equivalent qualification in the subject (s)he wishes to study and submit proof thereof, and

Satisfied Senate as to his/her proficiency in the subject

**SELECTION**

As only a limited number of students can be admitted to the programme, applicants will be subject to a selection procedure.

**DURATION**

Unless Senate decides otherwise, the duration of the degree is subject to rule A.4.5 in the University Calendar Part 1.

**CURRICULUM**

The PhD programme is offered in the following specialisation areas:

- **Nursing**
- **Psychology**
- **Public Health**
- **Social Work**
- **Sport, Recreation and Exercise Science**
- **Child and Family Studies**

**ASSESSMENT**

Assessment is governed by Rule A.5 as stipulated in the University Calendar: General Information Part 1.

**PROGRESS RULES**

Registration for the following year of study will be recommended by the supervisor if in his/her opinion adequate progress has been made during the current year.

**RENEWAL OF REGISTRATION**
The renewal of registration will be governed by the Rule A.4, as stipulated in the University Calendar: General Information Part 1.

SPECIAL REQUIREMENTS FOR THE PROGRAMME

Students must meet with their supervisors according to the memorandum of understanding dually signed by both parties.

Students are expected to present to the department regularly for supervision/guidance and to attend the recommended additional courses, skills development and seminars as relevant to the students’ needs, or determined by the department. Candidates will be required to present their proposals on a prescribed date determined by the department before handing in the final proposals to the Higher Degrees and Senate Higher Degrees Committees.

An oral examination may be required

Additional or related modules in the subject area may be required.
